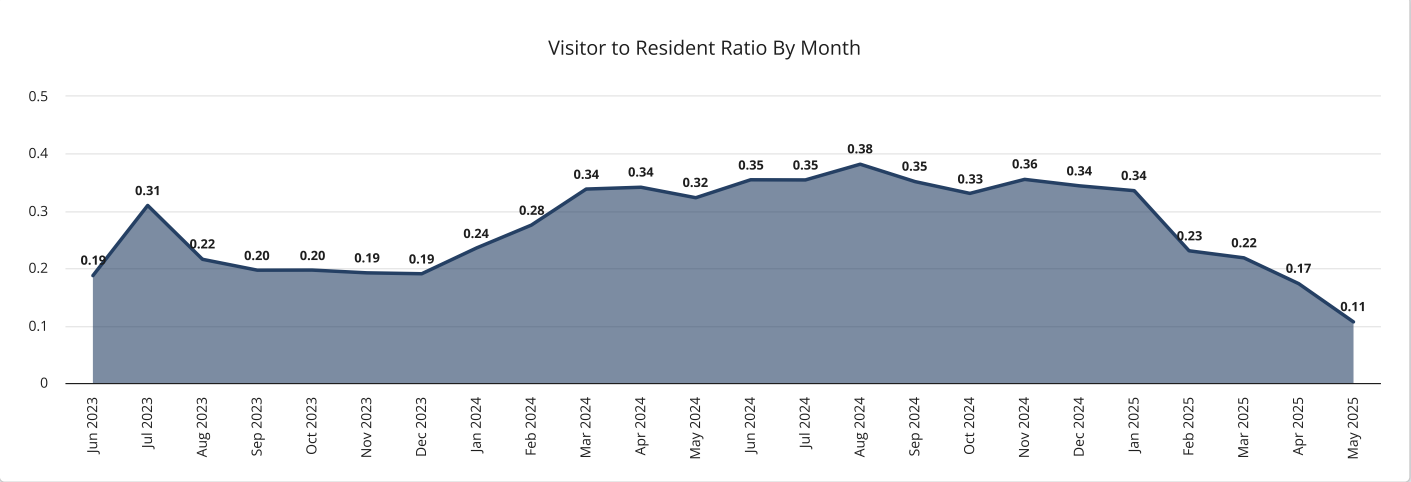
Identify months that are experiencing compression, or months which are opportunities for generating demand by looking for peaks and valleys in the Visitor-to-Resident ratio. This ratio shows the volume of visitors compared to the volume of residents. The higher the number, the more visitors compared to residents.



Identify markets that drive a quality visit

Sample Size Reference

These metrics provide a reference for the number of unique visitor devices (Zartico Geolocation Data) and cardholders (Zartico Spend Data) used in the insights above and are controlled by the filters selected at the top. If these show yellow or red values, the insights should be treated as directional but less precise, owing to a smaller sample size. In these cases, expanding your filter criteria at the top will increase the sample size.
