69.8% OCCUPANCY	**$558** ADR	**$396** REVPAR	**1** 2026-Q4 COMPRESSION DAYS
+6.1% YOY OCC % CHANGE	**+21.5%** YOY ADR % CHANGE	**+30.0%** YOY REVPAR % CHANGE	**60.5%** GROUP ROOM DEMAND SHARE

Group demand share figure is an industry benchmark (STR/CBRE), pending a live STR group-segment export; see Page 8.

This Week's Headline

BOOKING WINDOW SIGNAL

The trailing 14-day average occupancy is 71.3% vs. the 30-day baseline of 72.8%, a -2.1pp delta indicating down near-term demand. Recommended action: early discount risk window, consider targeted p...

2026-Q4 COMPRESSION

Current quarter (2026-Q4) has logged 1 day above 80% occupancy and 0 days above 90%. Historical Q3 average is 33 days above 80%: the highest compression window of the year. Q3 peak demand is approx...

REVPAR STABLE AT $401.24 (30-DAY AVG); YOY +

The trailing 30-day average RevPAR is $401.24, with ADR at $534.16 and occupancy at 72.8%. Year-over-year RevPAR growth is +35.8%, signaling a healthy pricing environment: rate discipline should be...

Chain-Scale Segment Detail

SEGMENT PERFORMANCE & TAX ESTIMATE

Year-to-Date 2026, Newport Beach/Dana Point, CoStar Submarket Report

Segment Performance

Newport Beach/Dana Point submarket, by chain-scale tier

SEGMENT	ROOMS	OCC %	ADR	REVPAR
Luxury & Upper Upscale	6,000	69.7%	$470	**$327**
Upscale & Upper Midscale	4,400	75.8%	$175	**$133**
Midscale & Economy	1,300	79.7%	$105	**$84**

CoStar's submarket report does not break out individual competitor hotels; figures shown are by chain-scale tier.

Segment-Level Tax Estimate

TBID (1.25%) and TOT (10%) applied to CoStar-reported annual room revenue

SEGMENT	ROOM REV.	SHARE	EST. TBID	EST. TOT
Luxury & Upper Upscale	$717.4M	73.9%	$8.97M	**$71.74M**
Upscale & Upper Midscale	$213.0M	22.0%	$2.66M	**$21.30M**
Midscale & Economy	$39.7M	4.1%	$0.50M	**$3.97M**

Estimates are CoStar-implied, not reported room revenue.

Estimated group demand share	**25% – 32%**
Estimated annual group room revenue	**$116.3M – $148.9M**
Estimated annual group TBID	**$1.82M – $2.33M**
Estimated annual group TOT	**$11.63M – $14.89M**
Compression days per year (80%+ occ)	**135**

Cross-Dataset Insights

Require both STR and Datafy — invisible in either dataset alone

HIDDEN OPPORTUNITY

Datafy records 935,500 day trips (40.6% of 2,305,893 total trips) that generate zero hotel revenue. At current ADR of $534.16, converting just 3% (28,065 trips) to one-night stays would generate $14,991,139.36 in incr...

FORWARD DEMAND INDEX

The PULSE Demand Signal Index for week of 2026-09-27 is 48/100 (LOW, declining). The index synthesizes 6 data sources: Google search demand (35%), seasonal beach quality (20%), destination awareness (15%), gas price a...

HIDDEN SIGNAL

Cross-referencing STR and Datafy reveals a critical campaign misallocation risk. Los Angeles drives 19% of visitor-days (the most of any DMA) but spends only $205/visitor-day (0.84× spend-efficiency index). By contras...

STR, CoStar, and Datafy are treated as current-period sources. Zartico (June 2025 snapshot) is historical reference only and is never presented as current data. Group Intelligence figures are industry benchmarks (STR/CBRE 2024) pending a live STR group-segment export; TBID and TOT estimates elsewhere in this report use CoStar-implied room revenue, not reported room revenue.
