Movement Summary

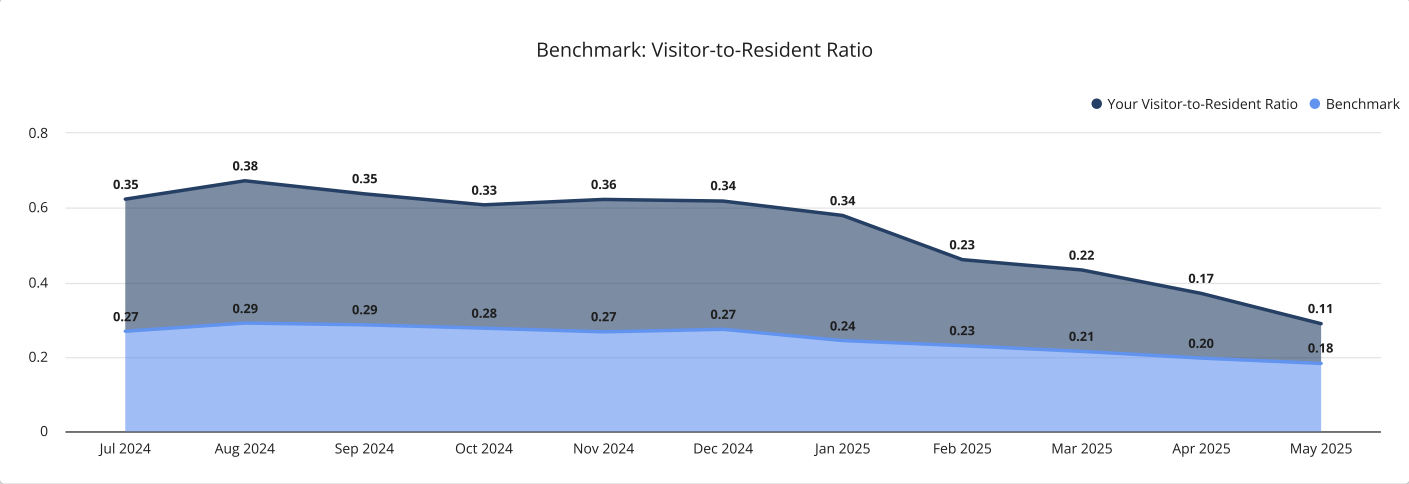
Understand how visitors and residents are moving throughout your destination. Note that geolocation data less than 30 days old is subject to slight changes through the normalization process.

These insights are based on a device count sample size of **19,862**.

These insights are based on a date range **2024-07-01** to **2025-05-27**.

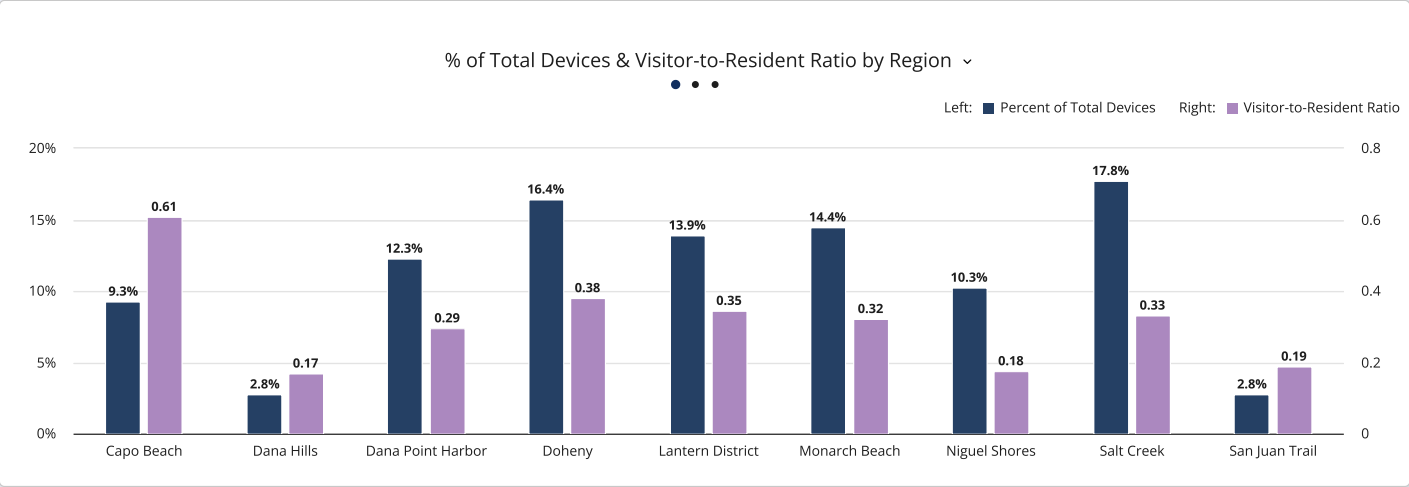
How does your Visitor-to-Resident Ratio compare to the average of all Zartico clients?

Source: Zartico Geolocation Data.
The visitor-to-resident ratio measures the "stress" a visitor economy is placing on the resident quality of life. Better understand how your ratio compares to the average of all Zartico clients.



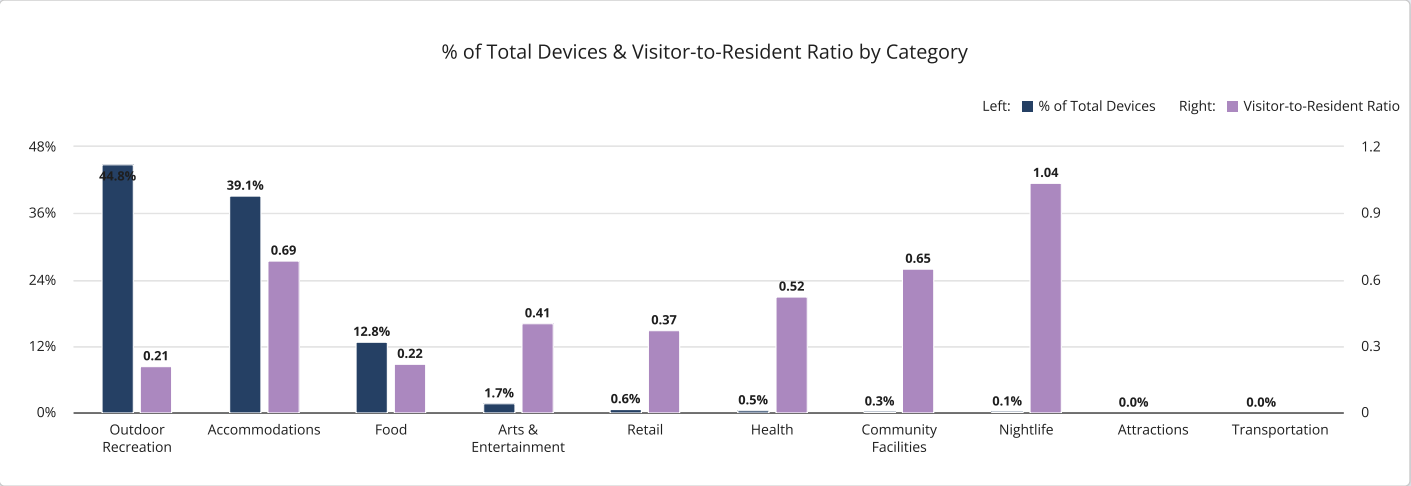
What Regions are devices observed in?

Source: Zartico Geolocation Data
Better understand how visitor and resident movement compares in your destination's regions, and how much movement each region sees.



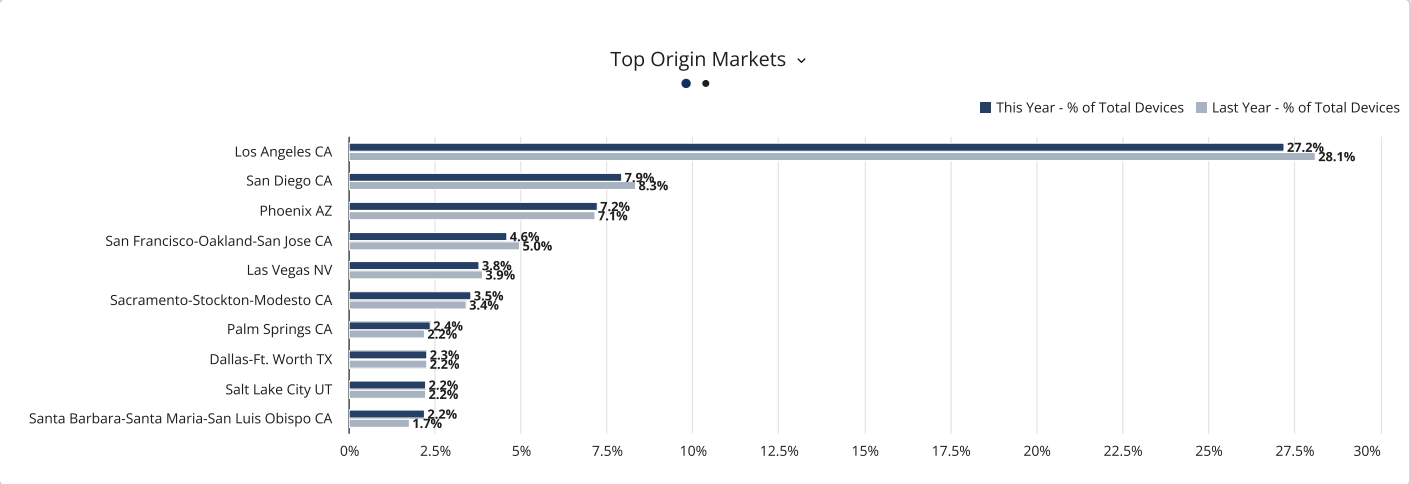
What types of places are devices going to within your destination?

Source: Zartico Geolocation Data
Better understand how visitor and resident movements compares in your destination's place categories, and how much movement each place category sees.



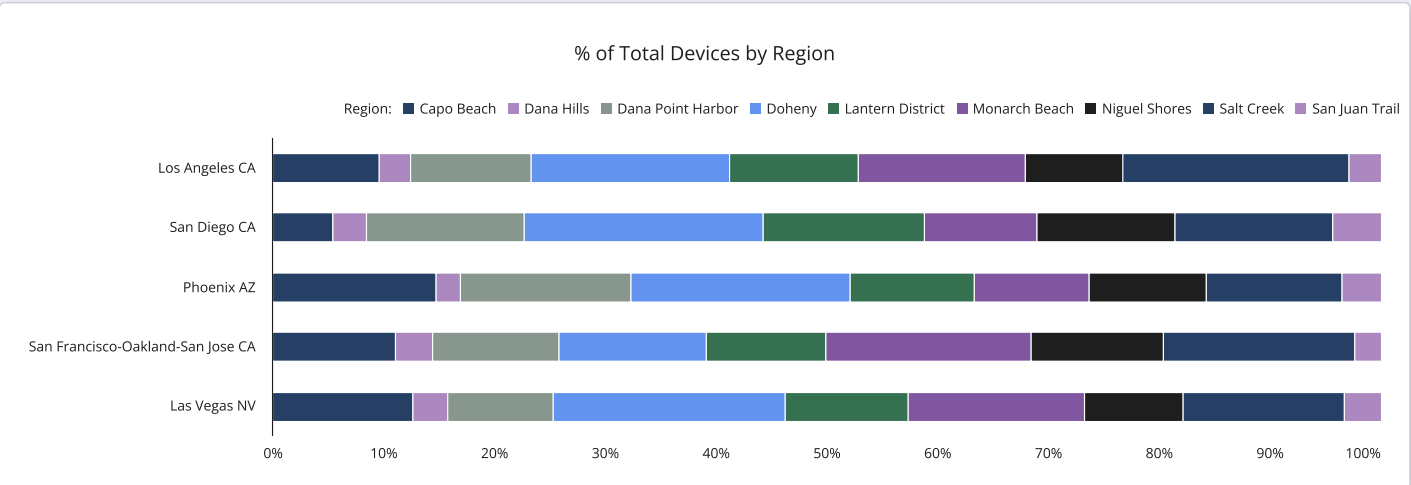
Where are your visitors coming from?

Source: Zartico Geolocation Data
Better understand your top origin markets by place category or Regions by using the filters at the top.



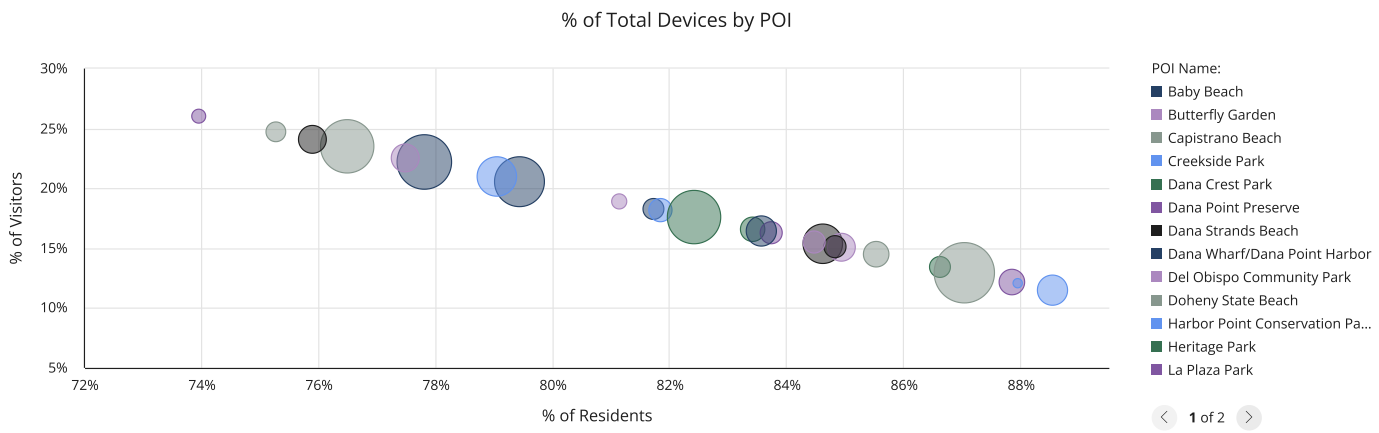
Which regions are your top markets most likely to visit?

Source: Zartico Geolocation Data
Better understand how your top market areas move in your destination.



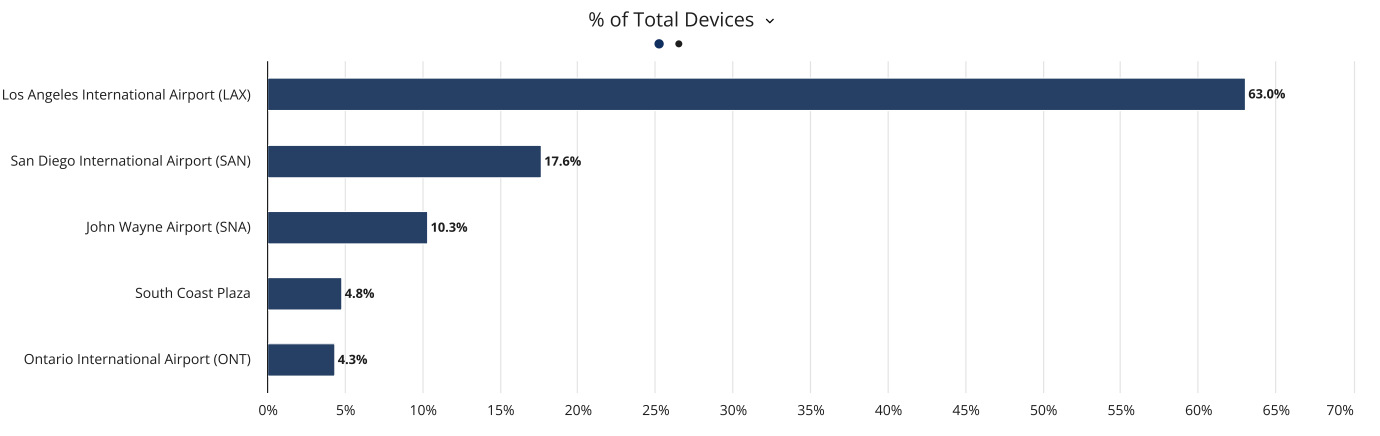
Of your top places of impact, which see more visitors and which see more residents?

Source: Zartico Geolocation Data
Better understand movement at your top POIs. The larger the bubble, the more movement is seen at that place. The position of the bubble on the chart indicates if more visitors or more residents are observed there. Tip: Click on a bubble to drill in to the top market areas observed at that place.



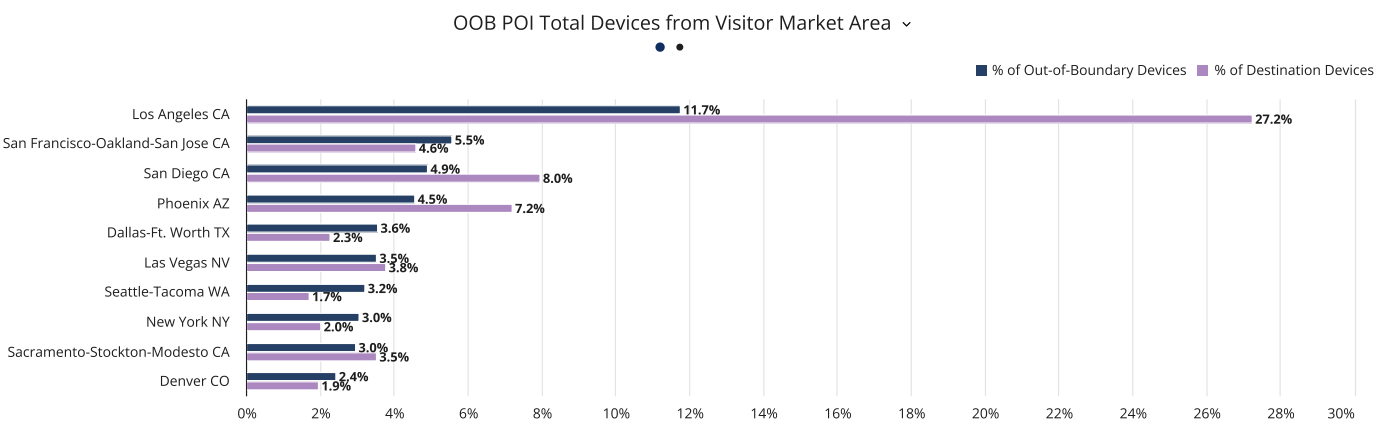
Which of my Out-of-Boundary POIs see the most movement?

Source: Zartico Geolocation Data
In the first insight, look to the markets populating the OOB POIs as compared to your destination visitors. Are there markets in the OOB POIs that don't regularly visit your destination? This may be a market opportunity to pursue. In the second insight, see the top visited OOB POIs and drill in to see the Market Areas visiting those POIs.



What markets are observed at your Out-of-Boundary POIs compared to your destination?

Source: Zartico Geolocation Data
Understand which market areas have the most movement to your Out-of-Boundary POIs and how those same market areas compare in their movement within your destination.



Sample Size Reference

These metrics provide a reference for the number of unique visitor devices (Zartico Geolocation Data) and cardholders (Zartico Spend Data) used in the insights above and are controlled by the filters selected at the top. If these show yellow or red values, the insights should be treated as directional but less precise, owing to a smaller sample size. In these cases, expanding your filter criteria at the top will increase the sample size.

Total Device Count	Visitor Device Count	Geolocation data loaded through:
