Spending Summary

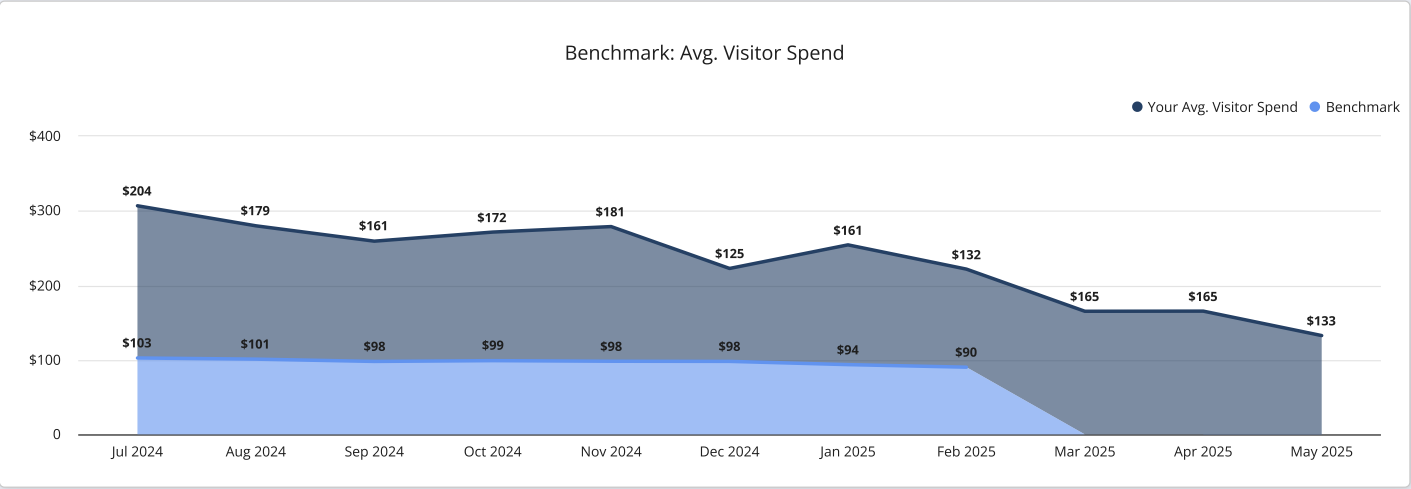
See where visitors are spending money in your destination to understand economic impact. Use this information to identify opportunities to align marketing strategies with visitor interests.

These insights are based on a cardholder count sample size of **7,668**.

These insights are based on a date range **2024-07-01** to **2025-05-23**.

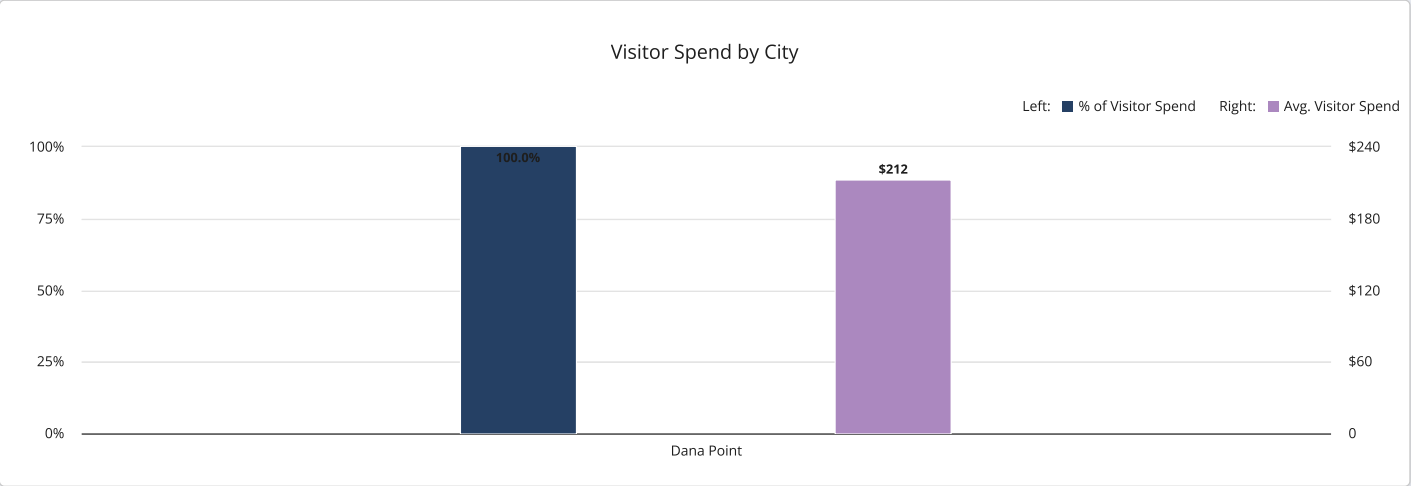
How does your Avg. Visitor Spend compare to the Avg. Visitor Spend across all Zartico clients?

Source: Zartico Spend Data
Average visitor spend is total visitor spend / total visitor cardholders. If you are looking at three days and one cardholder spends across all three days, the average cardholder spend goes up because the visitor spend goes up, while the cardholder count stays the same.



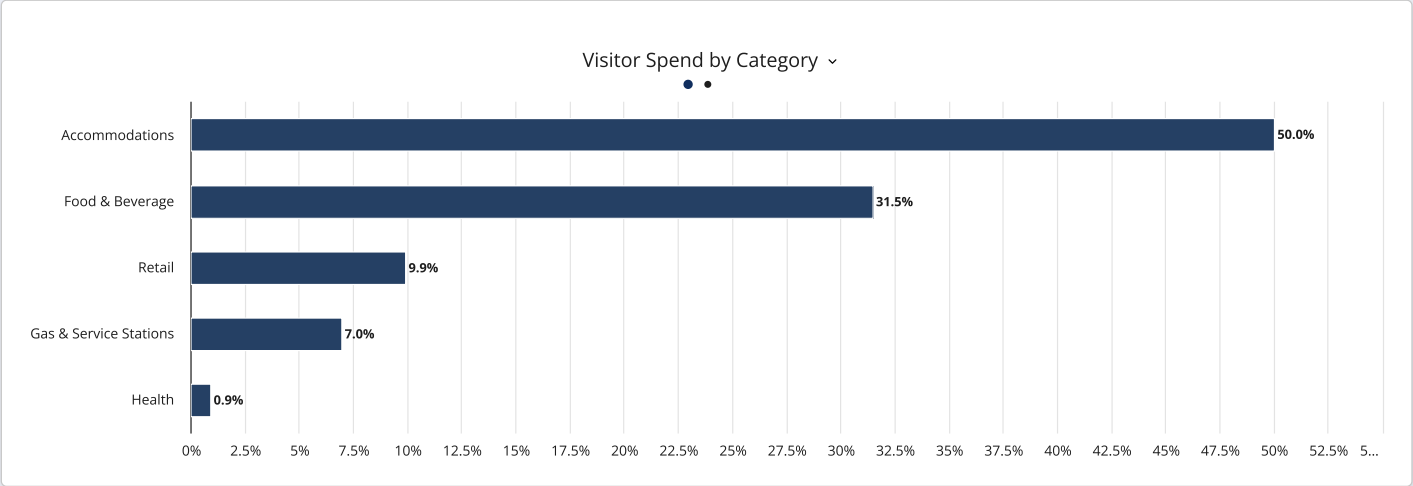
Where are visitors spending?

Source: Zartico Spend Data



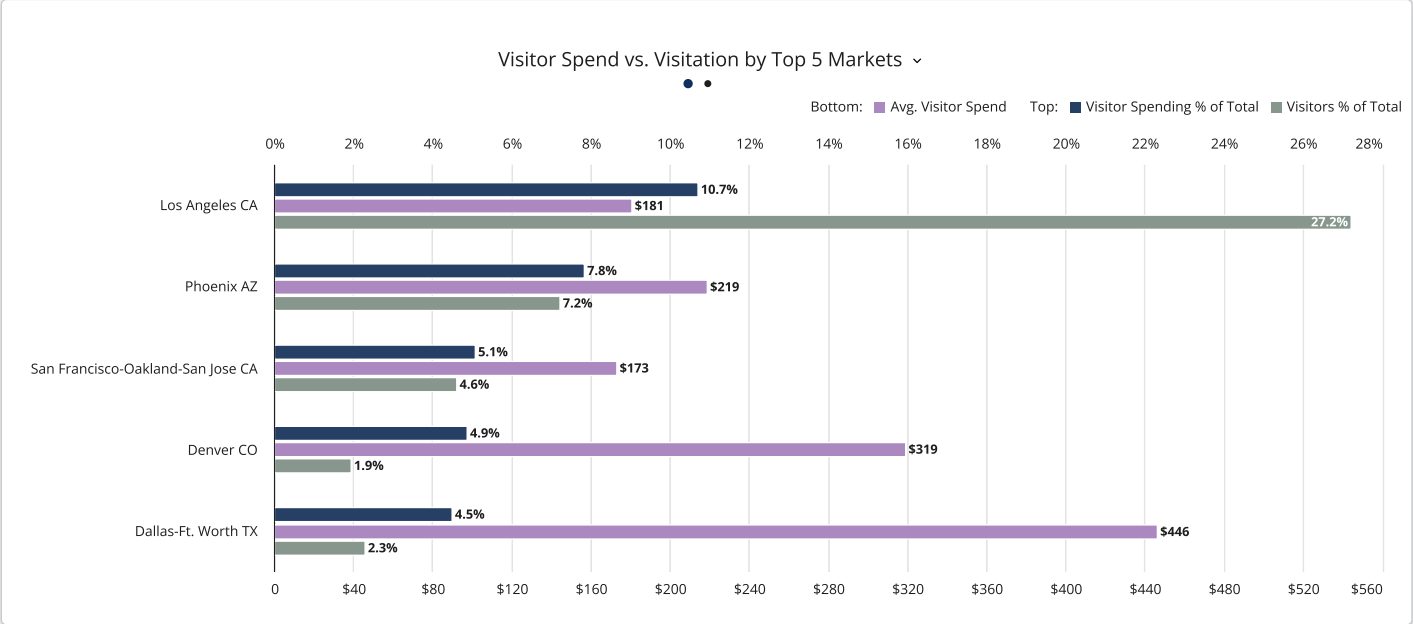
What are visitor spending money on?

Source: Zartico Spend Data
Better understand, of all of the visitor spending we see in your destination, how much spending is seen in each category. Tip: Click on a category to see a breakout of the spending we see at merchant types within that category.



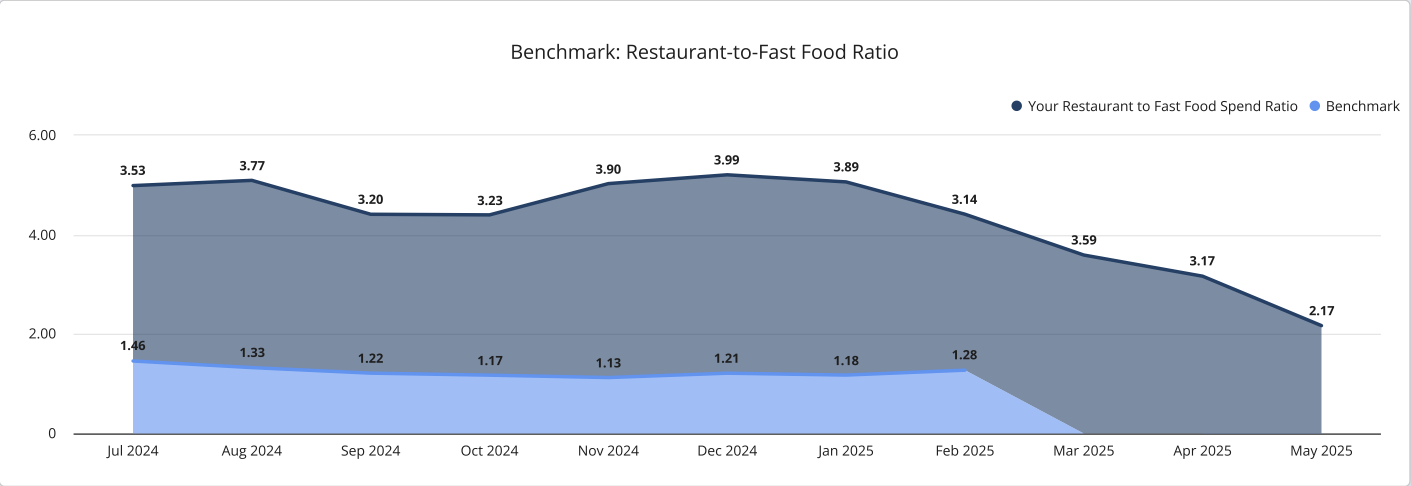
What are your top visitor spend markets?

Source: Zartico Spend Data
Better understand which market areas have the greatest impact on spending in your destination and how those same markets contribute to visitation.



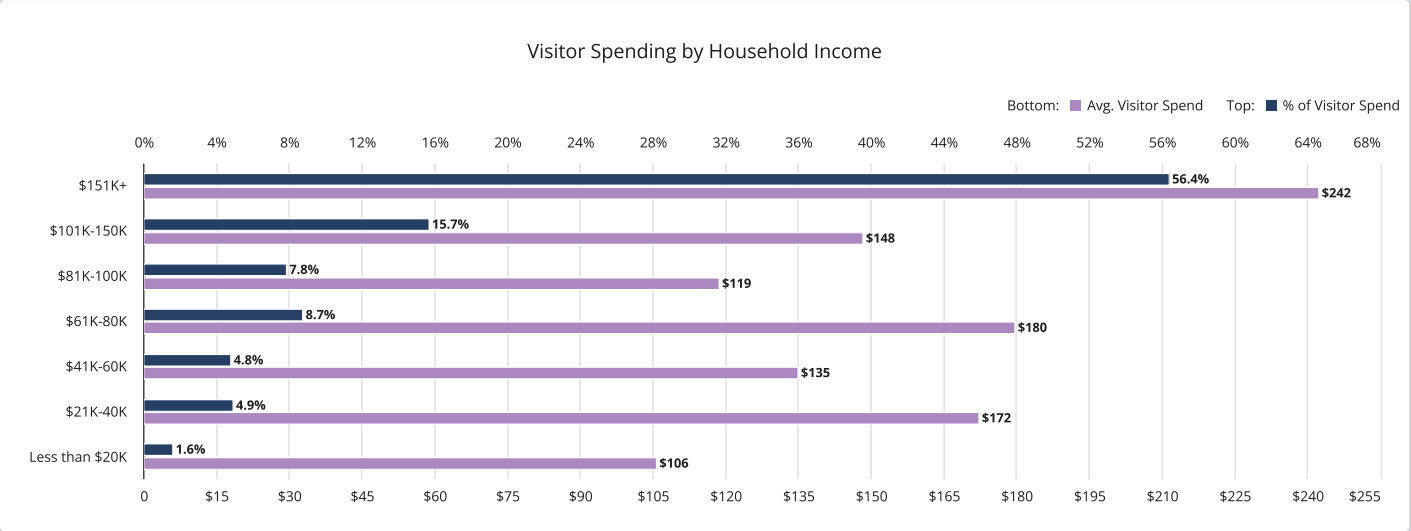
How does your Restaurant-to-Food Ratio compare to the average of all Zartico clients?

Source: Zartico Spend Data
This benchmark helps to provide a frame of reference for how effectively a destination is cultivating visits to their local restaurants. The higher the number, the more visitors are spending at restaurants as compared to fast food places.



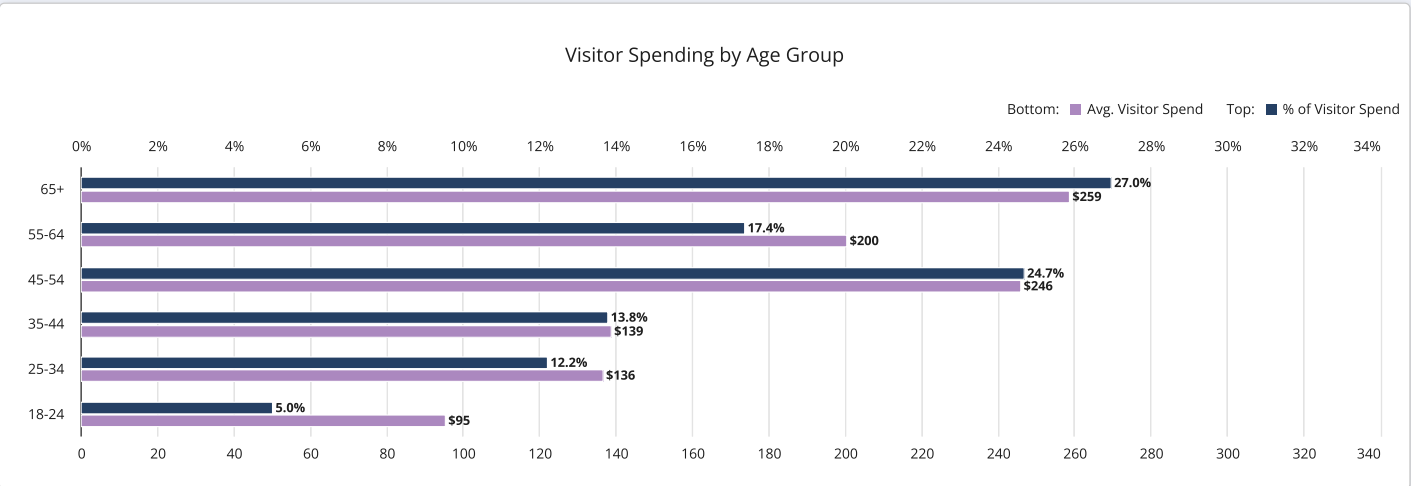
Which income levels are spending the most in destination and which are the highest value?

Source: Zartico Spend Data
Better understand which cardholder income ranges have the greatest impact on spending in your destination.



Which age groups are spending the most in destination?

Source: Zartico Spend Data
Better understand which cardholder age groups have the greatest impact on spending in your destination.



Sample Size Reference

These metrics provide a reference for the number of unique visitor devices (Zartico Geolocation Data) and cardholders (Zartico Spend Data) used in the insights above and are controlled by the filters selected at the top. If these show yellow or red values, the insights should be treated as directional but less precise, owing to a smaller sample size. In these cases, expanding your filter criteria at the top will increase the sample size.
