Overview

Orange County Hospitality

12 Mo Occupancy	12 Mo ADR	12 Mo RevPAR	12 Mo Supply	12 Mo Demand
74.5%	$219	$163	22M	16.4M

Orange County remains one of the most complex and diverse lodging markets in Southern California, supported by a broad mix of leisure, group, corporate, and resort-oriented demand. Unlike many coastal California markets that rely heavily on a single source of visitation, Orange County benefits from multiple demand generators that are geographically dispersed and serve distinct traveler segments. Momentum strengthened toward year-end 2025 and continued in 2026, resulting in trailing 12-month RevPAR growth of 9.4% through September.

Anaheim functions as the county's primary tourism hub, anchored by Disneyland Resort and the Anaheim Convention Center, while Newport Beach, Laguna Beach, and Dana Point comprise one of the state's premier coastal resort corridors. At the same time, Irvine, Santa Ana, and Costa Mesa provide a substantial business travel component supported by concentrations of professional services firms, financial institutions, healthcare organizations, higher education facilities, and regional corporate headquarters. This combination of tourism infrastructure, coastal recreation amenities, convention activity, and employment centers creates a lodging market with a relatively balanced demand profile and a broader foundation than many competing West Coast destinations.

Recent market conditions have reflected a gradual transition from the moderation experienced through much of 2025 toward stronger operating momentum in 2026. Leisure travel continues to represent the largest source of room demand, supported by Orange County's beaches, entertainment offerings, and favorable drive-to accessibility from Southern California's population base. However, demand growth has become increasingly diversified as convention and business-related travel have improved. Anaheim continues to benefit from a robust event calendar that supports weekday occupancy and generates compression throughout surrounding lodging districts, while employment centers in Irvine, Santa Ana, and Costa Mesa are showing increased business travel activity after a period of corporate caution. These dynamics have contributed to a healthier balance between occupancy and pricing performance, allowing operators to pursue revenue growth through a combination of improving demand and sustained rate discipline. Although competition for discretionary travel spending remains elevated, the market continues to benefit from its unique combination of tourism infrastructure, resort destinations, and business activity.

Looking ahead, Orange County's lodging market is expected to benefit from several long-term demand catalysts. The region's proximity to major global events in Los Angeles, including the 2026 FIFA World Cup and the 2028 Summer Olympics, is expected to generate incremental visitation and spillover lodging demand. The DisneylandForward initiative represents one of the most significant tourism developments currently underway in the region and is expected to create additional entertainment, dining, and visitor-oriented experiences within the Anaheim resort district. Similarly, the multi-billion-dollar OCVIBE development surrounding the Honda Center is poised to enhance the county's entertainment offerings and create new demand generators over time.

These projects complement a convention sector that continues to attract large-scale meetings and events while further diversifying the region's visitor economy. At the same time, the development pipeline remains modest relative to the market's size, limiting near-term competitive pressure and allowing future demand growth to be absorbed more efficiently. While elevated operating costs and changing travel preferences remain important considerations, Orange County's combination of destination appeal, economic diversity, and ongoing investment activity should continue to support stable lodging fundamentals over the foreseeable future.

Supply growth remains modest. Currently, just 3 hotels with 670 rooms are under construction, expanding inventory by approximately 1.1% by 2028, limiting near-term competitive pressure.

Investment activity cooled but remained active. A total of 15 hotel transactions totaling $234 million closed over the past 12 months, under the three-year average of $322 million. The pullback reflects broader investor caution amid elevated financing costs, measured revenue growth, and lingering uncertainty around the pace of demand recovery.

Hotel performance in Orange County strengthened meaningfully entering late 2025 and early 2026, signaling a transition from mid-year softness to a more constructive operating environment. The market posted positive trailing 12-month RevPAR growth of approximately 9.4%through September, but that average masks a clear improvement in momentum in recent months as demand rebuilt, occupancy firmed, and pricing power returned in peak and shoulder periods.

Orange County's lodging performance continues to reflect the advantages of a highly diversified demand base that draws from leisure, group, and corporate travel segments. While leisure demand remains the primary driver of room night production, particularly in Anaheim and the county's coastal resort communities, business-related travel and convention activity play an increasingly important role in shaping weekday occupancy patterns. This diversification distinguishes Orange County from many leisure-oriented destinations and provides additional stability during periods when discretionary travel spending softens. The market benefits from several distinct lodging clusters, including the Disneyland Resort area, the Newport Beach and Dana Point luxury resort corridor, and the Irvine, Santa Ana, and Costa Mesa business districts, each serving different traveler profiles and demand characteristics.

Group demand strengthened meaningfully as convention, meeting, and event activity continued to normalize. The Anaheim Convention Center remains one of the market's most significant demand generators, supporting substantial weekday occupancy and driving compression throughout the Disneyland submarket during major events. Corporate transient demand also improved as travel activity across Orange County's business corridors became more consistent. Market participants have reported greater booking visibility, fewer short-notice cancellations, and somewhat longer booking windows compared with the uncertainty experienced during earlier phases of the recovery. These factors have supported healthier pricing conditions and reduced the need for widespread discounting during shoulder periods.

Performance continues to vary by submarket. Newport Beach and Dana Point remain the county's pricing leaders due to their concentration of luxury and upper-upscale resorts, while Anaheim benefits from some of the highest occupancy levels in the market because of its tourism and convention infrastructure. Santa Ana and Costa Mesa continue to benefit from a balanced mix of business and leisure demand tied to large employment centers, while more price-sensitive locations have generally experienced a slower recovery cycle.

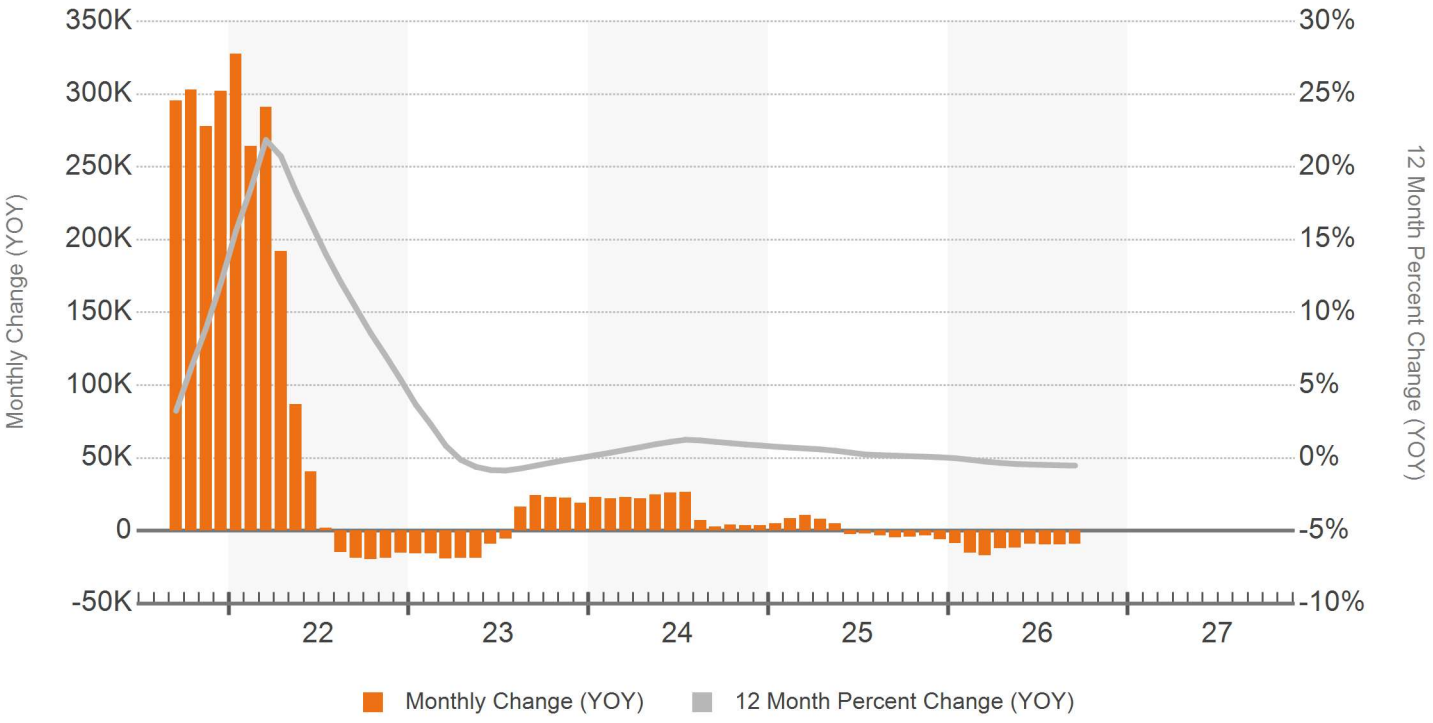

Looking ahead, Orange County's RevPAR is projected to maintain the positive RevPAR momentum, supported in part by its proximity to a series of major global events in Los Angeles, including the recently concluded 2026 FIFA World Cup and the upcoming 2028 Summer Olympics. While matches were centered outside the county, spillover demand from visitors, media, and team operations provided incremental upside.

Longer-term demand prospects are also being reinforced by sustained investment in regional attractions. Disneyland continues to evolve through initiatives such as DisneylandForward, which will introduce a new mixed-use entertainment district combining dining, retail, live performances, and upgraded rides. Nearby, Anaheim's $4 billion OCVIBE redevelopment adjacent to the Honda Center is progressing through phased openings, with full buildout targeted by 2028. Together, these projects underscore a long-term commitment to tourism infrastructure that should help underpin hotel demand over the next decade.

Hotel construction activity across Orange County remains exceptionally restrained relative to the market's size, tourism significance, and long-term investment appeal. Development conditions continue to be shaped by elevated construction costs, higher financing expenses, labor constraints, and increasingly selective lending standards. These factors have significantly reduced the number of projects moving from planning into active construction despite continued investor interest in the market. As a result, Orange County's pipeline remains modest compared with many major lodging markets and reflects one of the more supply-constrained development environments in California. Anaheim continues to attract the majority of development activity due to its proximity to Disneyland Resort, the Anaheim Convention Center, Angel Stadium, the Honda Center, and a growing collection of entertainment and mixed-use projects.

As a result, only 3 projects totaling roughly 670 rooms remain under active development, expected to increase supply by 1.1% through 2028. The 125-room Tribute Portfolio Anaheim Downtown is scheduled to open in March 2027, followed by the 172-room Home2 Suites by Hilton Orange County in mid-2027 and the 371-room Kimpton Garden Grove Anaheim in late 2028. The Kimpton, part of a five-acre mixed-use development by SCG America Group, will incorporate food and beverage and retail components while benefiting from proximity to Disneyland, the Anaheim Convention Center, Angel Stadium, and the Honda Center. The project highlights continued investor confidence in the region's leisure-driven demand base and its concentration of large-scale event generators.

The most recent supply addition was the 91-room La Quinta Inn & Suites in the Northwest/Fullerton submarket, which opened in February 2025. Looking ahead, development activity remains concentrated along the Disneyland corridor, where several projects are progressing through final planning stages. These include a proposed Le Méridien in Garden Grove, along with multiple AC Hotels planned across Anaheim South, Costa Mesa, and Laguna Hills.

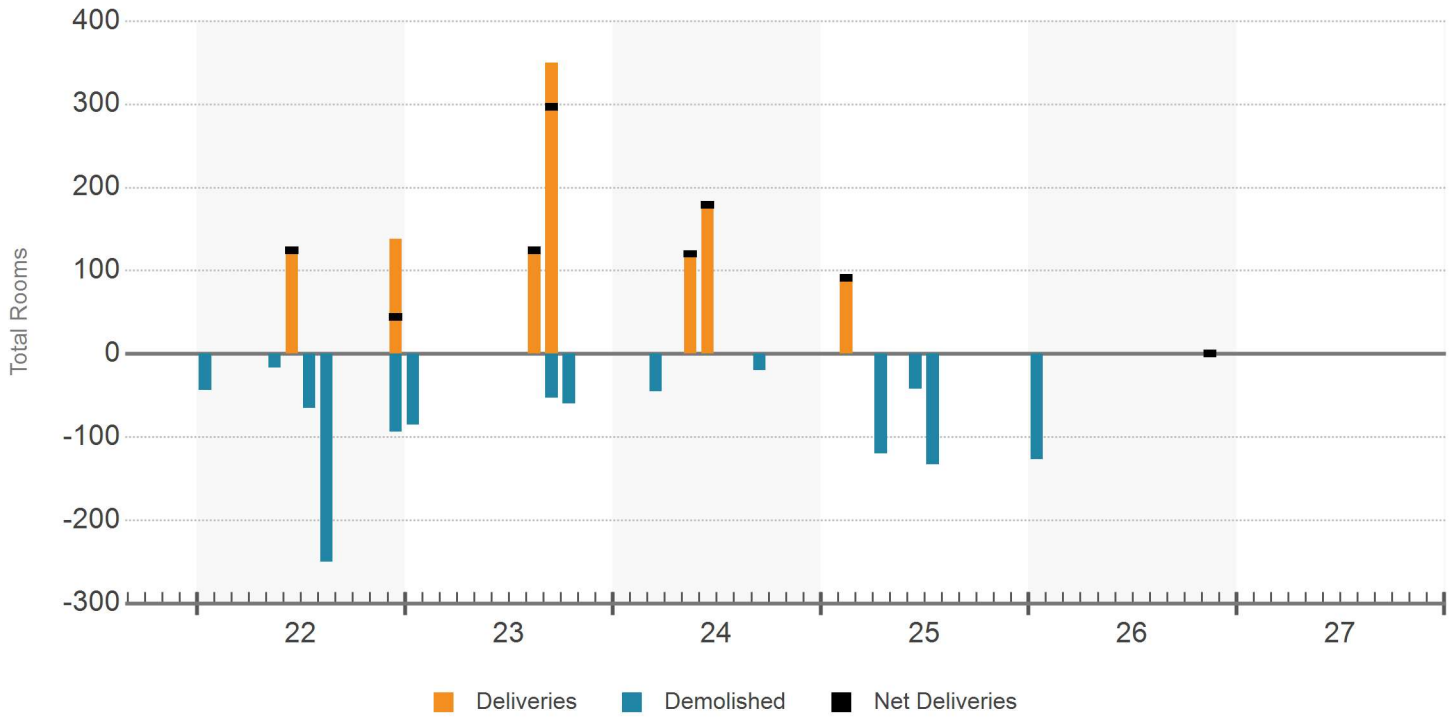

From a market perspective, the limited size of the active pipeline suggests only modest competitive pressure over the near term. New inventory represents a small percentage of existing room supply and is scheduled to enter the market gradually over several years rather than through a concentrated delivery cycle. Looking further ahead, Anaheim's DisneylandForward initiative may encourage additional hospitality development as the resort district evolves and new entertainment, dining, and mixed-use components are introduced. Similarly, broader redevelopment activity occurring around the Honda Center and OCVIBE district could create opportunities for future hotel investment. Nevertheless, the county's high barriers to entry, constrained development sites, extensive entitlement requirements, and elevated capital costs are expected to continue limiting new supply growth. These conditions should remain supportive of occupancy and pricing fundamentals while helping preserve the competitive positioning of existing assets throughout the market.

Momentum could build further following Anaheim's approval of the DisneylandForward zoning initiative, which expands flexibility for mixed-use development across the resort district. This framework is expected to support additional hospitality, retail, and entertainment projects over time, reshaping the area's development landscape. Even with these projects in the pipeline, overall supply growth remains restrained relative to other major California markets, as elevated financing costs and tighter capital conditions continue to limit new development. However, increasing interest along Anaheim's redevelopment corridor suggests construction activity could reaccelerate once capital markets stabilize and economic visibility improves.

Orange County remains one of the premier lodging investment markets in California due to its combination of coastal resort assets, convention-oriented hotels, and business-focused lodging properties. The market attracts a broad range of investor profiles, from private owners and regional operators to institutional capital seeking long-term exposure to Southern California hospitality assets. Limited availability of developable land, strong tourism fundamentals, and the presence of several high-barrier-to-entry coastal submarkets have historically supported elevated hotel values relative to many competing markets. As a result, transaction activity tends to reflect both local operating conditions and broader capital market trends.

Investment activity moderated over the past year as elevated borrowing costs and persistent valuation gaps reduced overall transaction volume compared with the stronger acquisition environment experienced in 2024. Over the past year, 15 hotels traded for a combined $234 million, below the three-year average of $322 million.

Private buyers accounted for much of the recent acquisition activity, particularly among select-service, extended-stay, and independent hotels where transaction sizes were more approachable and financing requirements less restrictive. Coastal properties continued to attract significant attention due to their scarcity and long-term replacement-cost advantages, while convention-oriented and tourism-driven assets in Anaheim benefited from investor interest tied to continued visitation growth and long-term development initiatives. The transaction landscape increasingly reflected a bifurcated market, with premium assets sustaining stronger pricing while more operationally intensive or secondary properties traded at more moderate valuations.

Several recent transactions highlight these dynamics. Larger trades remained concentrated in Anaheim and Irvine, while multiple smaller acquisitions occurred across extended-stay and select-service properties throughout the county. The most significant transaction closed in May 2026, when the 352-room Anaheim Resort Suites, which is under a ground lease, sold for $78.75 million, or $223,722 per key. In early 2026, the hotel dropped its national chain loyalty program with Choice Hotels under the Cambria Hotel & Suites brand and rebranded as Anaheim Suites Hotel. The hotel is known for its large recreation water park, pool area, and suite-style rooms.

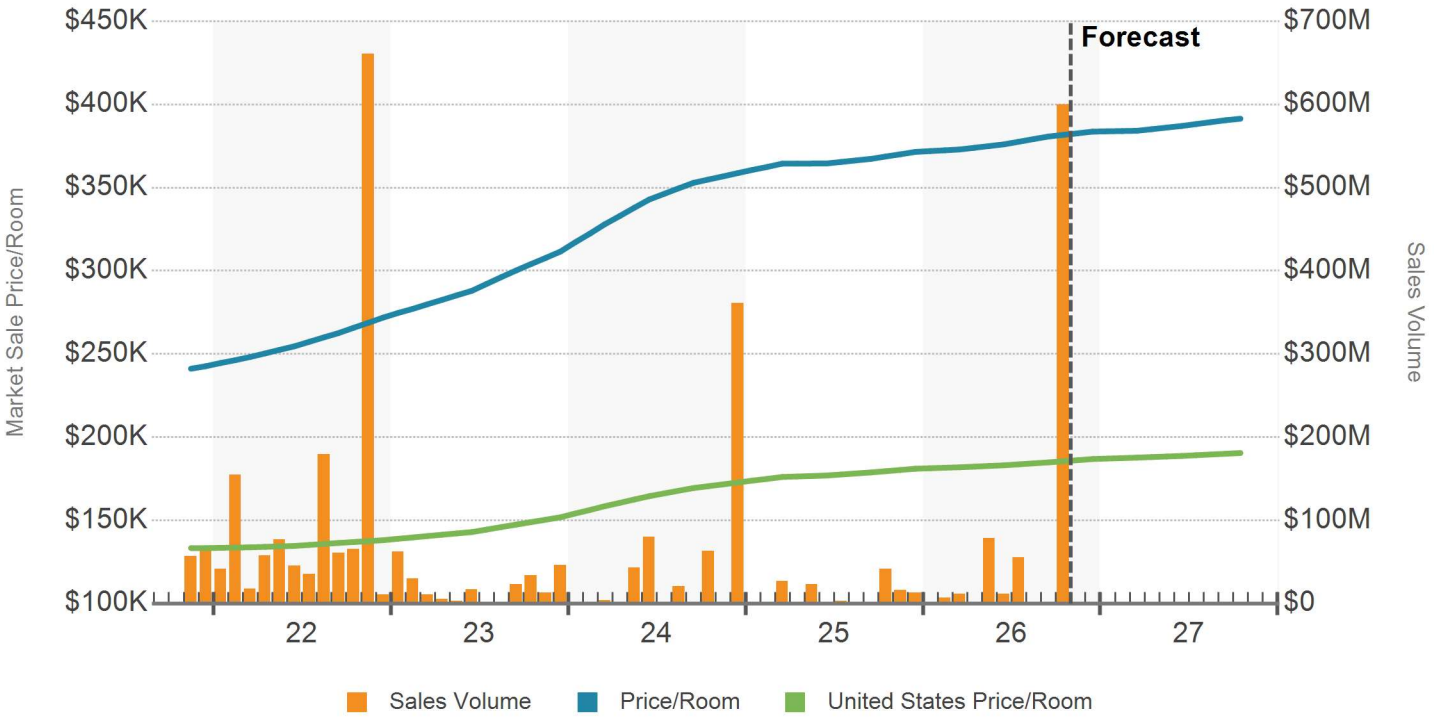

In late 2025, several Sonesta-branded extended-stay and select-service properties traded as part of portfolio transactions involving Service Properties Trust, generally at pricing below $130,000 per key. These deals reflect growing interest from buyers focused on yield and operational stability rather than near-term appreciation.

Resort-oriented submarkets such as Newport Beach, Dana Point, and Laguna Beach continued to capture a disproportionate share of total dollar volume, supported by limited supply and strong leisure fundamentals. In contrast, Anaheim remained relatively quiet outside of the marquee portfolio sale, reflecting its concentration of larger, higher-priced assets and wider bid-ask spreads.

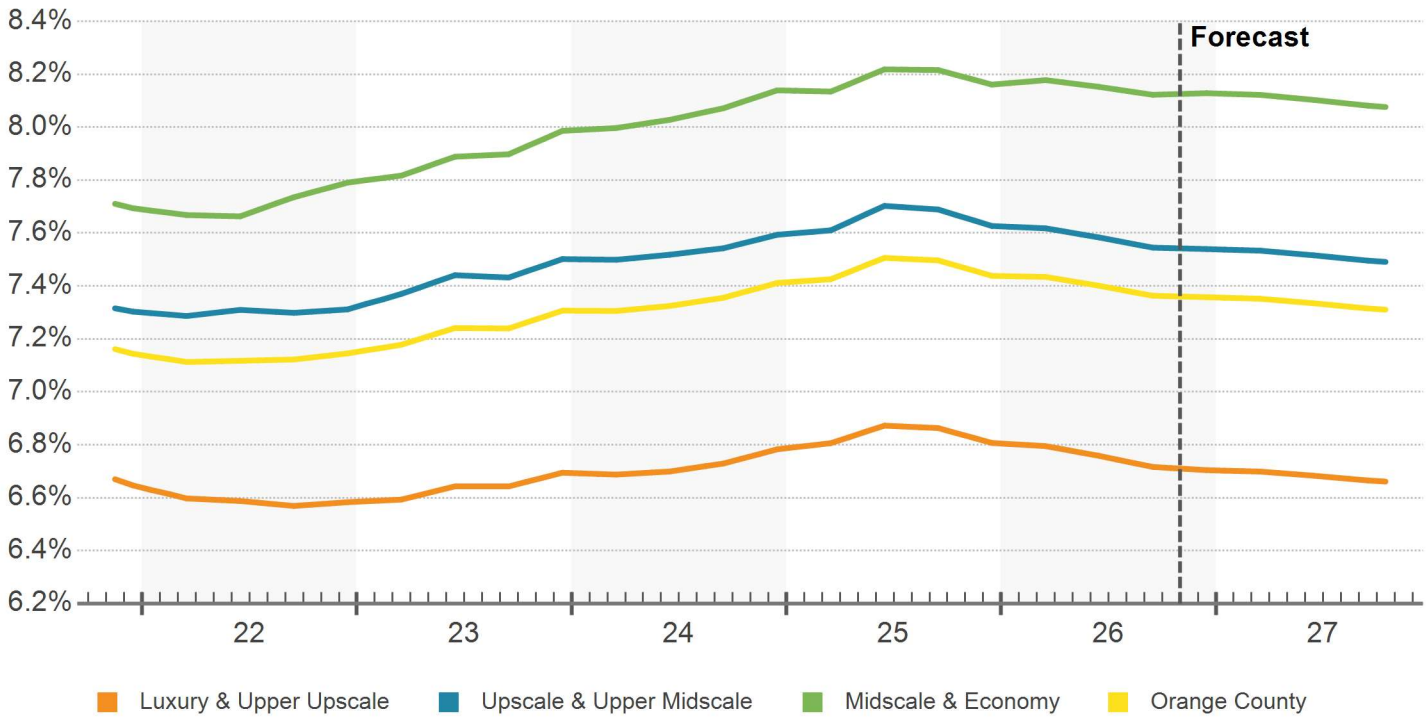

Looking ahead, transaction momentum is expected to remain measured through 2026 with sales driven by refinancing risks amidst elevated borrowing costs, and ongoing brand-mandated capital programs. While many investors remain cautious, Orange County's durable leisure appeal, coastal scarcity, and proximity to global attractions continue to attract patient capital focused on long-term value creation rather than short-term trading.

Orange County's economy remains diverse, with professional and business services and financial activities leading white-collar employment, heavily concentrated around Irvine. Major financial anchors such as PIMCO and Pacific Life remain headquartered in Newport Beach, while Hyundai Capital America is based in Irvine. Happy Money, once noted in Tustin, now lists corporate offices in Torrance/Costa Mesa.

Tourism remains a cornerstone of the local economy, with Disneyland Resort drawing close to 19 million visitors annually and underpinning a large share of hotel demand in Anaheim. Lodging tied to the resort area typically accounts for roughly half of the city's total hotel revenue, reinforcing Anaheim's role as Orange County's primary tourism hub. While park attendance and ticket pricing have trended higher, profitability across Disney's local operations has been pressured by rising operating costs and softer hotel occupancy. Labor remains the most significant factor. California's statewide minimum wage increased to $16.50 on January 1, 2025, with higher thresholds in certain jurisdictions. In Anaheim, resort-area living-wage requirements pushed covered Disney wages to $19.90 in 2024 and $20.42 in 2025, following court rulings that upheld the ordinance's applicability.

The Walt Disney Company continues to be Orange County's largest private employer, with its local workforce exceeding 35,000 employees as of 2023. Longer term, the approved DisneylandForward initiative provides a major growth catalyst. The comprehensive rezoning and redevelopment plan received final City Council approval in May 2024 and is expected to unlock at least $1.9 billion in investment over its first decade. City-commissioned studies project meaningful job creation and incremental tax revenue as new attractions, hotels, dining venues, and retail concepts are integrated within the existing resort footprint.

Group demand is anchored by the Anaheim Convention Center (ACC), the largest exhibition facility on the West Coast, offering more than 1 million square feet of exhibit space. According to Visit Anaheim, approximately 160 conventions, meetings, and events were scheduled for 2025, generating an estimated $1.4 billion in economic impact and roughly $15 million in transient occupancy tax (TOT) revenue for the city. Looking ahead, the organization has already secured 142 events for 2026, projected to produce about $1.74 billion in economic impact and nearly 600,000 hotel room nights. These figures underscore the continued importance of conventions in supporting weekday occupancy and stabilizing seasonal demand patterns across the Anaheim lodging market.

Air access remains a key supporting factor, though volumes have fluctuated in recent years. John Wayne Airport (SNA) handled a record 11.74 million passengers in 2023 before traffic declined to 11.09 million in 2024, reflecting airline capacity adjustments and softer leisure demand. Preliminary full-year indicators for 2025 suggest a modest rebound, with passenger volumes trending slightly above 2024 levels as service stabilizes and demand normalizes. The airport continues to offer strong domestic connectivity through 13 commercial carriers, reinforcing Orange County's accessibility for both leisure and business travelers.

Orange County also benefits as a drive-to tourism market, surrounded by a drive market of 20 million people within a 90-mile radius.

(1) Completed transaction data is based on actual arms-length sales transactions and levels are dependent on the mix of what happened to sell in the period.

(2) Market price trends data is based on the estimated price movement of all properties in the market, informed by actual transactions that have occurred. The price index is not smoothed.
