Orange County remains driven primarily by leisure-oriented demand. While performance moderated through much of 2025 and exhibited periods of volatility, momentum strengthened toward year-end and continued in 2026, resulting in trailing 12-month RevPAR growth of 6.7% through July.

Submarket dynamics continued to shape overall performance. Coastal destinations such as Newport Beach and Dana Point sustained the highest average daily rates due to their concentration of luxury and upper-upscale properties, while Anaheim remained the county's largest source of room nights and maintained some of the strongest occupancy levels. The Anaheim Convention Center remains a key demand generator, supporting midweek business travel and helping stabilize seasonal demand patterns. Visit Anaheim reported roughly 160 conventions, meetings, and events scheduled for 2025, drawing close to 900,000 attendees and reinforcing the importance of the meetings segment for weekday occupancy.

Signature attractions such as Disneyland, Huntington Beach, and Dana Point continue to anchor visitation, but competition for discretionary travel dollars has intensified. Some domestic travelers have redirected spending toward international trips, cruises, and alternative accommodations, creating incremental pressure on local

hotel demand, particularly outside peak leisure windows.

Looking ahead, Orange County's lodging market is expected to benefit from several long-term demand catalysts. The region's proximity to major global events in Los Angeles, including the 2026 FIFA World Cup and the 2028 Summer Olympics, is expected to generate incremental visitation and spillover lodging demand. At the same time, ongoing tourism investments, most notably Disneyland's DisneylandForward expansion and the \$4 billion redevelopment of the OCVIBE entertainment district near the Honda Center, should further strengthen the region's long-term tourism infrastructure and support sustained growth in hotel demand.

Supply growth remains modest. Currently, just 3 hotels with 670 rooms are under construction, expanding inventory by approximately 1.1% by 2028, limiting near-term competitive pressure.

Investment activity cooled but remained active. A total of 11 hotel transactions totaling \$179 million closed over the past 12 months, under the three-year average of \$337 million. The pullback reflects broader investor caution amid elevated financing costs, measured revenue growth, and lingering uncertainty around the pace of demand recovery.

Hotel performance in Orange County strengthened meaningfully entering late 2025 and early 2026, signaling a transition from mid-year softness to a more constructive operating environment. The market posted positive trailing 12-month RevPAR growth of approximately 6.7% through July, but that average masks a clear improvement in momentum in recent months as demand rebuilt, occupancy firmed, and pricing power returned in peak and shoulder periods.

From a demand-mix perspective, the market's recovery has been supported by a gradual normalization of weekday activity following a period of corporate caution earlier in the year. Corporate transient demand, particularly in employment-dense corridors such as Santa Ana, Costa Mesa, and Irvine, has shown signs of stabilization, reinforcing baseline occupancy outside of leisure and event-driven peaks. While corporate travel has not fully returned to pre-pandemic norms, the recent improvement suggests fewer discretionary cutbacks and a rebuilding of routine business travel tied to professional services, healthcare, education, and regional headquarters activity.

Leisure demand remains the market's backbone and continues to provide downside protection. Signature attractions, coastal resort destinations, and the county's drive-to profile underpin consistent weekend and seasonal visitation. Importantly, as discretionary leisure patterns normalized, operators were better positioned to balance occupancy and rate, rather than relying on discounting to stimulate demand during softer periods.

Group demand has emerged as a key contributor to the reacceleration in performance. The Anaheim Convention Center continues to anchor this segment, with conventions, trade shows, and large-scale events driving meaningful compression across the Disneyland and adjacent submarkets. The return of group activity has supported both occupancy and ADR, particularly during event-heavy weeks when availability tightens across the broader region.

Conversations with market participants point to improved booking visibility entering 2026, with fewer last-minute

cancellations and a gradual extension of booking windows. Air service stability at John Wayne Airport and improving regional connectivity have further supported short-stay business travel and group arrivals, enhancing confidence in near-term demand trends.

Supply dynamics have reinforced these gains. New deliveries remain limited and concentrated, leading to effective supply contraction at times. With minimal competitive pressure in the near term, improving demand has translated more directly into higher occupancy and stronger revenue performance.

Submarket results continue to diverge. Newport Beach–Dana Point and Disneyland lead the county in pricing power, while Santa Ana–Costa Mesa has benefited from improving corporate and group fundamentals. By contrast, more price-sensitive submarkets lagged earlier in the cycle but are now participating in the broader recovery as demand normalizes.

Looking ahead, Orange County's RevPAR is projected to maintain the positive RevPAR momentum, supported in part by its proximity to a series of major global events in Los Angeles, including the recently concluded 2026 FIFA World Cup and the upcoming 2028 Summer Olympics. While matches were centered outside the county, spillover demand from visitors, media, and team operations provided incremental upside.

Longer-term demand prospects are also being reinforced by sustained investment in regional attractions. Disneyland continues to evolve through initiatives such as DisneylandForward, which will introduce a new mixed-use entertainment district combining dining, retail, live performances, and upgraded rides. Nearby, Anaheim's \$4 billion OCVIBE redevelopment adjacent to the Honda Center is progressing through phased openings, with full buildout targeted by 2028. Together, these projects underscore a long-term commitment to tourism infrastructure that should help underpin hotel demand over the next decade.

(2) Labor costs are already included in the operating expenses above. Amounts shown in Total Labor Costs are for additional detail only.

Hotel construction across Orange County has slowed to one of the lowest levels in recent memory. Currently, only 3 projects totaling roughly 670 rooms remain under active development. The 85-room Fairfield by Marriott Inn & Suites Anaheim Resort is scheduled to open in fall 2026, followed by the 125-room Tribute Portfolio Anaheim Downtown in March 2027, the 172-room Home2 Suites by Hilton Orange County in mid-2027 and the 371-room Kimpton Garden Grove Anaheim in late 2028.

The Kimpton, part of a five-acre mixed-use development by SCG America Group, will incorporate food and beverage and retail components while benefiting from proximity to Disneyland, the Anaheim Convention Center, Angel Stadium, and the Honda Center. The project highlights continued investor confidence in the region's leisure-driven demand base and its concentration of large-scale event generators.

The most recent supply addition was the 91-room La Quinta Inn & Suites in the Northwest/Fullerton submarket, which opened in February 2025. Looking

ahead, development activity remains concentrated along the Disneyland corridor, where several projects are progressing through final planning stages. These include a proposed Le Méridien in Garden Grove, along with multiple AC Hotels planned across Anaheim South, Costa Mesa, and Laguna Hills.

Momentum could build further following Anaheim's approval of the DisneylandForward zoning initiative, which expands flexibility for mixed-use development across the resort district. This framework is expected to support additional hospitality, retail, and entertainment projects over time, reshaping the area's development landscape.

Even with these projects in the pipeline, overall supply growth remains restrained relative to other major California markets, as elevated financing costs and tighter capital conditions continue to limit new development. However, increasing interest along Anaheim's redevelopment corridor suggests construction activity could reaccelerate once capital markets stabilize and economic visibility improves.

After rebounding in 2024, hotel investment across Orange County cooled again in 2025 and 2026 as higher borrowing costs and persistent valuation gaps weighed on deal flow. Over the past year, 11 hotels traded for a combined \$179 million, below the three-year average of \$337 million but broadly in line with national transaction trends.

Recent activity skewed toward smaller midscale, upper-midscale, and independent properties, with most transactions completed by private buyers rather than institutional capital. Pricing and deal velocity reflected a bifurcated environment, where well-located coastal and resort assets continued to command premium valuations, while suburban and extended-stay properties traded at more moderate levels.

The most significant transaction closed in May 2026, when the 352-room Anaheim Resort Suites, which is under a ground lease, sold for \$78.75 million, or \$223,722 per key. In early 2026, the hotel dropped its national chain loyalty program with Choice Hotels under the Cambria Hotel & Suites brand and rebranded as Anaheim Suites Hotel. The hotel is known for its large recreation water park, pool area, and suite-style rooms.

In late 2025, several Sonesta-branded extended-stay and select-service properties traded as part of portfolio transactions involving Service Properties Trust, generally at pricing below \$130,000 per key. These deals reflect growing interest from buyers focused on yield and operational stability rather than near-term appreciation.

Resort-oriented submarkets such as Newport Beach, Dana Point, and Laguna Beach continued to capture a disproportionate share of total dollar volume, supported by limited supply and strong leisure fundamentals. In contrast, Anaheim remained relatively quiet outside of the marquee portfolio sale, reflecting its concentration of larger, higher-priced assets and wider bid-ask spreads.

Looking ahead, transaction momentum is expected to remain measured through 2026 with sales driven by refinancing risks amidst elevated borrowing costs, and ongoing brand-mandated capital programs. While many investors remain cautious, Orange County's durable leisure appeal, coastal scarcity, and proximity to global attractions continue to attract patient capital focused on long-term value creation rather than short-term trading.

Orange County's economy remains diverse, with professional and business services and financial activities leading white-collar employment, heavily concentrated around Irvine. Major financial anchors such as PIMCO and Pacific Life remain headquartered in Newport Beach, while Hyundai Capital America is based in Irvine. Happy Money, once noted in Tustin, now lists corporate offices in Torrance/Costa Mesa.

Tourism remains a cornerstone of the local economy, with Disneyland Resort drawing close to 19 million visitors annually and underpinning a large share of hotel demand in Anaheim. Lodging tied to the resort area typically accounts for roughly half of the city's total hotel revenue, reinforcing Anaheim's role as Orange County's primary tourism hub. While park attendance and ticket pricing have trended higher, profitability across Disney's local operations has been pressured by rising operating costs and softer hotel occupancy. Labor remains the most significant factor. California's statewide minimum wage increased to \$16.50 on January 1, 2025, with higher thresholds in certain jurisdictions. In Anaheim, resort-area living-wage requirements pushed covered Disney wages to \$19.90 in 2024 and \$20.42 in 2025, following court rulings that upheld the ordinance's applicability.

The Walt Disney Company continues to be Orange County's largest private employer, with its local workforce exceeding 35,000 employees as of 2023. Longer term, the approved DisneylandForward initiative provides a major growth catalyst. The comprehensive rezoning and redevelopment plan received final City Council approval in May 2024 and is expected to unlock at least \$1.9 billion in investment over its first decade. City-commissioned studies project meaningful job creation

and incremental tax revenue as new attractions, hotels, dining venues, and retail concepts are integrated within the existing resort footprint.

Group demand is anchored by the Anaheim Convention Center (ACC), the largest exhibition facility on the West Coast, offering more than 1 million square feet of exhibit space. According to Visit Anaheim, approximately 160 conventions, meetings, and events were scheduled for 2025, generating an estimated \$1.4 billion in economic impact and roughly \$15 million in transient occupancy tax (TOT) revenue for the city. Looking ahead, the organization has already secured 142 events for 2026, projected to produce about \$1.74 billion in economic impact and nearly 600,000 hotel room nights. These figures underscore the continued importance of conventions in supporting weekday occupancy and stabilizing seasonal demand patterns across the Anaheim lodging market.

Air access remains a key supporting factor, though volumes have fluctuated in recent years. John Wayne Airport (SNA) handled a record 11.74 million passengers in 2023 before traffic declined to 11.09 million in 2024, reflecting airline capacity adjustments and softer leisure demand. Preliminary full-year indicators for 2025 suggest a modest rebound, with passenger volumes trending slightly above 2024 levels as service stabilizes and demand normalizes. The airport continues to offer strong domestic connectivity through 13 commercial carriers, reinforcing Orange County's accessibility for both leisure and business travelers.

Orange County also benefits as a drive-to tourism market, surrounded by a drive market of 20 million people within a 90-mile radius.

(1) Completed transaction data is based on actual arms-length sales transactions and levels are dependent on the mix of what happened to sell in the period.

(2) Market price trends data is based on the estimated price movement of all properties in the market, informed by actual transactions that have occurred. The price index is not smoothed.
