70.2%	\$290	\$204	4.2M	3M

The Newport Beach/Dana Point Submarket remains Orange County's strongest performer, consistently posting the highest ADR and RevPAR in the region. Its coastline, concentration of luxury assets, and affluent leisure base continue to anchor demand, supported by steady corporate and small-to-mid-size group activity. While national leisure indicators have softened, the impact in this submarket has been muted due to its premium positioning. For the 12 months ending April, RevPAR increased 4.6%, aided by stable demand, healthy pricing power, and no new hotel openings.

Early 2025 performance benefited from a temporary demand boost as lower- and mid-priced hotels housed residents displaced by the January Los Angeles wildfires. This dynamic lifted occupancy across the market, while upscale properties leaned on event-related demand and tactical pricing to sustain performance. Larger room configurations proved especially attractive to displaced households, helping support overall rate levels.

Looking ahead, growth is expected to carry forward into 2026, with stronger acceleration anticipated in 2027. A robust pipeline of marquee events, including the 2026 FIFA World Cup, the 2027 Super Bowl, and the 2028 Summer Olympics, should meaningfully support demand across Orange County and greater Southern California. That said, softer domestic leisure trends and uneven corporate travel recovery are likely to moderate the pace of gains.

The submarket's durability is underpinned by its sizable luxury inventory, which accounts for roughly 20% of total

rooms, and a well-balanced demand base. Coastal leisure demand remains the cornerstone, supplemented by corporate travel linked to nearby employment hubs and consistent group activity throughout the year. Accessibility via John Wayne Airport further enhances the market's appeal, alongside a steady calendar of destination-driven events such as yachting regattas, executive offsites, high-end weddings, and cultural draws like the Newport Beach Film Festival.

At the same time, profitability pressures are intensifying. The regionwide labor agreement finalized in 2024 will drive incremental wage increases through 2028, weighing on operating margins. Additional regulatory burdens, including Irvine's Hotel Worker Protection Ordinance, are adding to cost structures through requirements for daily room cleaning, tighter workload standards, and expanded safety measures.

Development remains extremely limited. No hotels have opened since 2021, and none are under construction. Projects in the final planning pipeline total fewer than 500 rooms across three proposals, indicating little near-term supply growth.

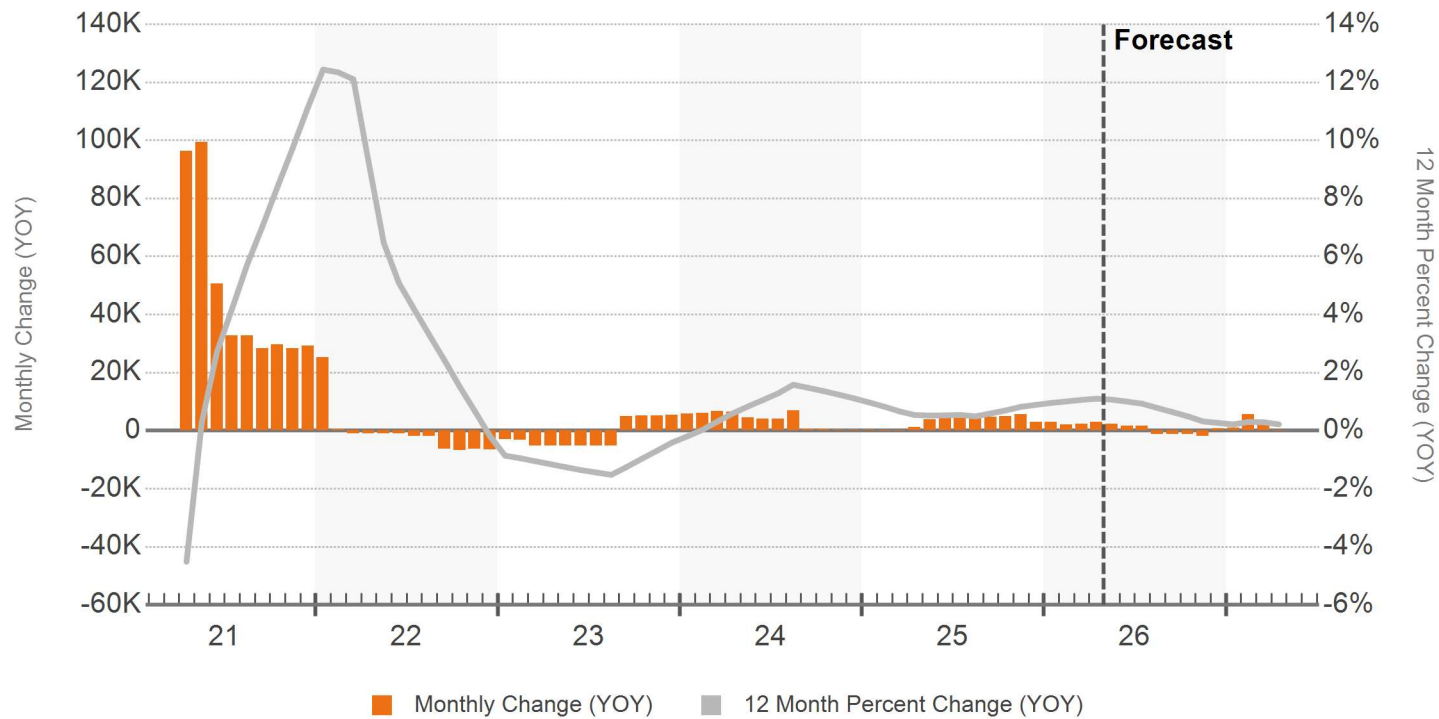

Investment activity has slowed considerably. A total of 4 properties traded in the last 12 months for a combined \$48.6 million, well below the three-year average of \$156 million. A single large transaction in 2024, accounted for more than 70% of total sales volume that year, lifting totals above 2023's historic low. Consistent with past cycles, turnover remains limited, reflecting both investor caution and the submarket's historically low liquidity.

(1) For Annual P&L, the current year exchange rate is used for each year going back in time. This current year exchange rate is the average of all 12 monthly rates for that year.

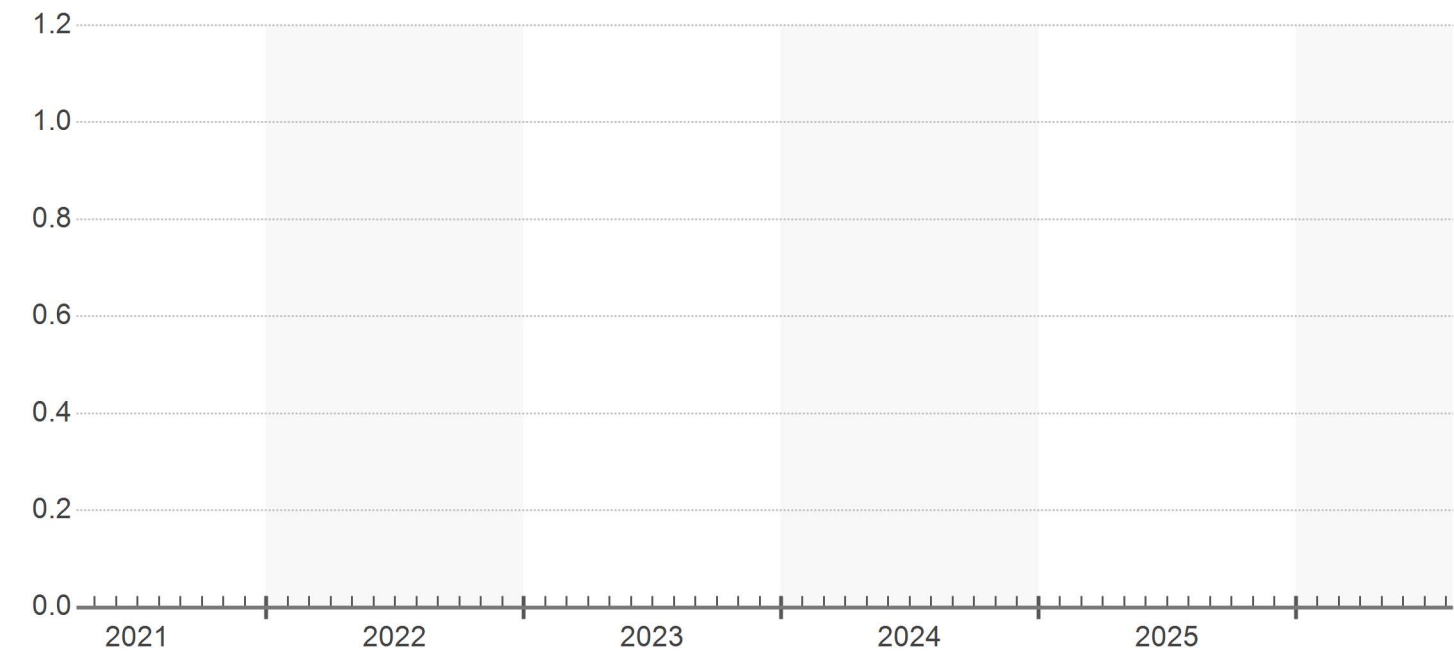

(2) Percentage of Revenues for departmental expenses (Rooms, Food & Beverage, and Other Departments) are based on their respective departmental revenues. All other expense percentages are based on Total Revenue.

(3) Labor costs are already included in the operating expenses above. Amounts shown in Total Labor Costs are for additional detail only.

UNDER CONSTRUCTION PROPERTIES

Over the past 12 months ending April, the Newport Beach/Dana Point Submarket recorded 4 hotel sales totaling \$48.6 million, materially below the three-year average of \$156 million, and indicative of continued investor caution. Transaction volume was meaningfully higher in 2024, reaching \$110.5 million, but that activity was heavily skewed by a single large sale in June, which accounted for more than 70% of the year's total and temporarily inflated overall deal volume.

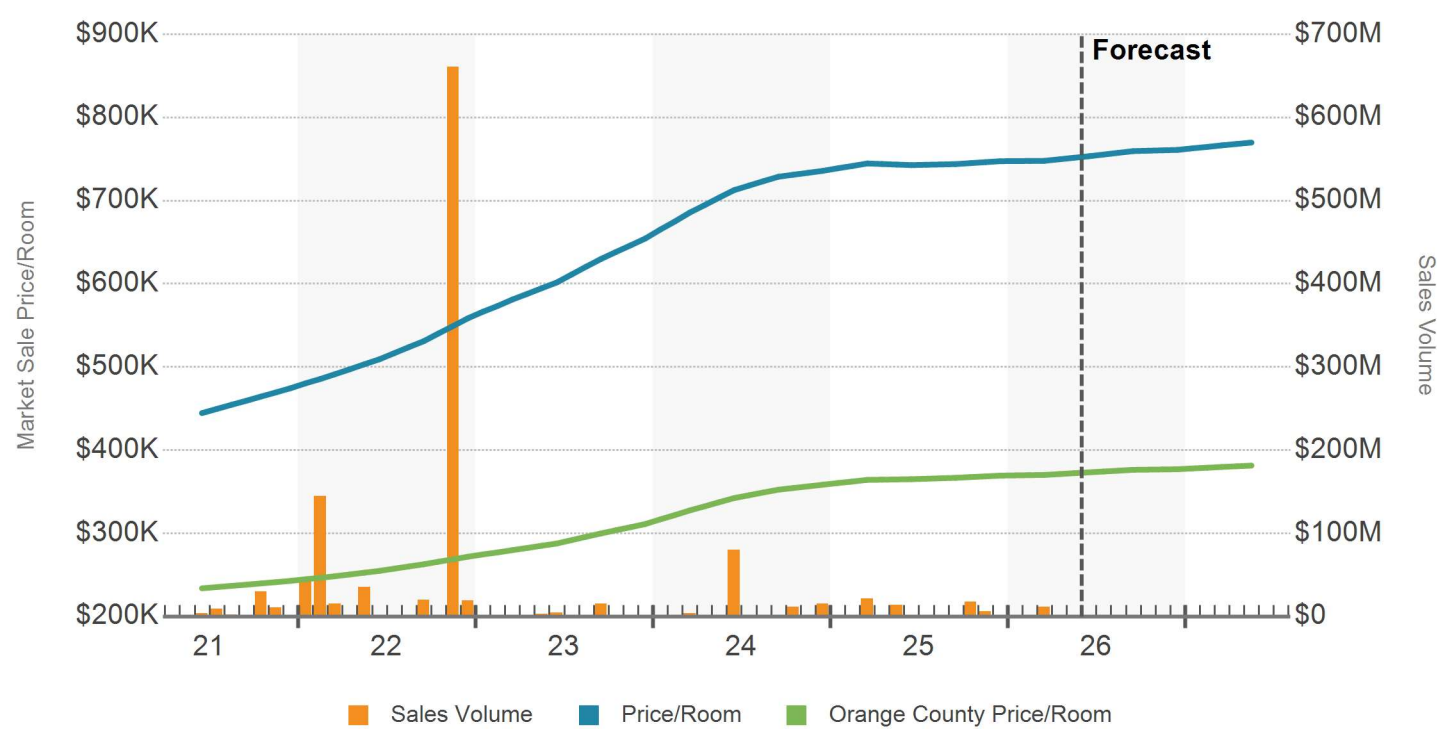

Deal activity was largely concentrated in smaller independent and limited-service hotels, with private buyers accounting for most acquisitions. The standout transaction in the market in the recent past, occurred in June 2024, when California-based Dune Drifter acquired the 125-room Pacific Edge Hotel in Laguna Beach for \$80 million, equating to approximately \$640,000 per key. Even with the asset operating under a ground lease, the pricing ranks among the highest ever achieved in the submarket. Highgate Hotels and Morgan Stanley, which purchased the property in 2017 for \$57.5 million, realized meaningful value appreciation. The implied cap rate of roughly 3% underscores investor conviction in the hotel's

irreplaceable coastal location and future redevelopment upside. Dune Drifter, backed by an investor group that includes Chris Harrison of the Marriott family, has announced plans to invest more than \$125 million in a full-scale repositioning, encompassing renovated guestrooms and enhanced amenity offerings.

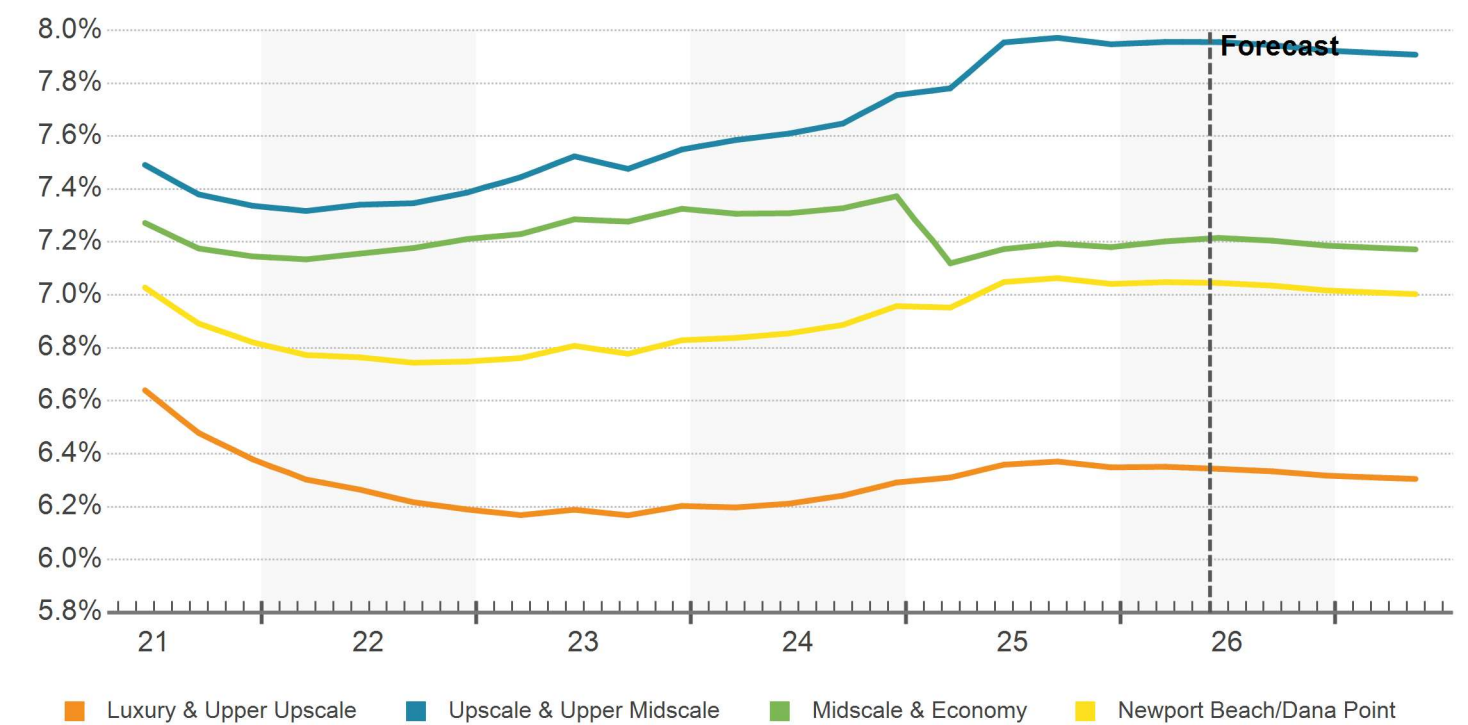

More broadly, the submarket continues to lead Orange County in transaction volume by deal count and maintains the region's highest concentration of luxury hotel inventory. It also stands alone as the only local submarket to have recorded hotel trades exceeding \$1 million per key over the past five years.

Looking ahead, deal flow is expected to remain limited. Investors continue to face elevated borrowing costs, risk-averse lenders, and uncertain operating fundamentals. Meanwhile, owners are weighing increasing capital needs, from brand-mandated PIPs to refinancing challenges and pressure from limited partners nearing the end of investment cycles. Until capital markets stabilize and performance strengthens more broadly, transaction volume is likely to remain muted.
