Overview

Newport Beach/Dana Point Hospitality

12 Mo Occupancy	12 Mo ADR	12 Mo RevPAR	12 Mo Supply	12 Mo Demand
71.2%	$303	$216	4.2M	3M

The Newport Beach/Dana Point submarket represents Orange County's premier coastal lodging destination, characterized by a concentration of luxury resorts, high barriers to entry, and one of the most affluent visitor bases in Southern California. Unlike inland Orange County submarkets that rely more heavily on corporate, airport, or convention demand, Newport Beach and Dana Point are primarily driven by destination-oriented leisure travel supported by oceanfront resorts, marinas, beaches, and upscale retail districts.

Leisure visitation serves as the foundation of room-night demand. Major attractions including Newport Harbor, Balboa Island, Fashion Island, Crystal Cove State Park, Dana Point Harbor, and Laguna Beach's arts and cultural scene draw visitors year-round. The area also benefits from destination weddings, wellness retreats, yachting activity, and other high-end travel experiences that reinforce its premium positioning.

Corporate and group demand provide additional support. Proximity to Irvine's employment base, numerous corporate headquarters, and John Wayne Airport generates consistent business travel, while executive retreats, association meetings, and small-group events supplement weekday occupancy. Regional events and festivals create additional compression throughout the year and contribute to the submarket's diversified demand profile.

The composition of the lodging inventory further differentiates Newport Beach/Dana Point from most Southern California markets. Luxury and upper-upscale hotels account for a substantial portion of existing rooms, attracting a disproportionately affluent customer base while supporting some of the highest lodging rates in Orange County. The presence of upscale and upper-midscale properties broadens the demand base without diminishing the submarket's luxury-oriented identity. Supply conditions remain one of the market's defining characteristics.

Development activity has been minimal due to entitlement constraints, coastal regulations, and limited availability of developable sites. This highly protected competitive environment continues to support long-term asset values and reinforces the submarket's position as one of Southern California's most desirable hotel markets.

Investment activity is also shaped by the submarket's scarcity value. Hotel ownership turnover tends to be limited, particularly among luxury resorts and beachfront assets, as investors are often reluctant to part with irreplaceable coastal real estate. As a result, transaction activity is typically driven by select opportunities rather than broad market liquidity, with investor interest remaining strongest for well-located properties offering long-term value appreciation and repositioning potential.

Against this backdrop, the following statistics further illustrate the size, composition, and operating profile of the Newport Beach/Dana Point lodging market

Newport Beach/Dana Point comprises 110 hotel properties, which contain around 12,000 rooms. Among the subtypes, there are 6,000 Luxury & Upper Upscale rooms, 4,400 Upscale & Upper Midscale rooms, and 1,300 Midscale & Economy rooms in Newport Beach/Dana Point.

As of September, Newport Beach/Dana Point 12-month occupancy is 71.2%, 12-month ADR is $300, and 12-month RevPAR is $220. Year over year, 12-month occupancy in Newport Beach/Dana Point has changed by 2.3%, 12-month ADR has changed by 6.8%, and 12-month RevPAR has changed by 9.3%.

Approximately 0 rooms are under construction in Newport Beach/Dana Point, accounting for 0.0% of its existing inventory. Over the past 12 months, roughly 0 rooms have opened across 0 building.

UNDER CONSTRUCTION PROPERTIES

Hotel investment activity in Newport Beach/Dana Point has historically been defined by limited asset availability, long ownership hold periods, and a concentration of luxury coastal properties. As a result, transaction volume tends to be episodic, with annual sales activity often shaped by a small number of significant transactions rather than a steady flow of trades.

Institutional and private equity investors have historically concentrated capital in the submarket's luxury and upper-upscale segment, where ownership opportunities are scarce and replacement costs remain exceptionally high. Over the past decade, Newport Beach/Dana Point has consistently achieved some of the highest per-key pricing in Orange County, reflecting the rarity and long-term desirability of coastal resort assets.

One of the most notable transactions was the acquisition of the 120-room Pacific Edge Hotel in Laguna Beach in March 2024 for $80 million, or $666,667 per key. The sale achieved pricing among the highest recorded in the submarket and highlighted continued investor conviction in beachfront hospitality assets despite a more challenging capital markets environment.

More recently, transaction activity has shifted toward smaller independent, boutique, and select-service hotels, with private and regional investors accounting for much of the available liquidity. While financing costs and wider bid-ask spreads have slowed deal velocity, investor interest remains supported by the submarket's luxury positioning, coastal scarcity, and substantial barriers to new supply.

The market's pricing environment continues to be influenced by asset scarcity. Meaningful trades occur infrequently, and when trophy assets become available, pricing is often driven as much by location, redevelopment potential, and replacement-cost barriers as by current operating performance. This dynamic has helped sustain some of the highest hotel valuations in Southern California.

Against this backdrop, recent market inactivity and prevailing pricing metrics further illustrate the submarket's investment environment.

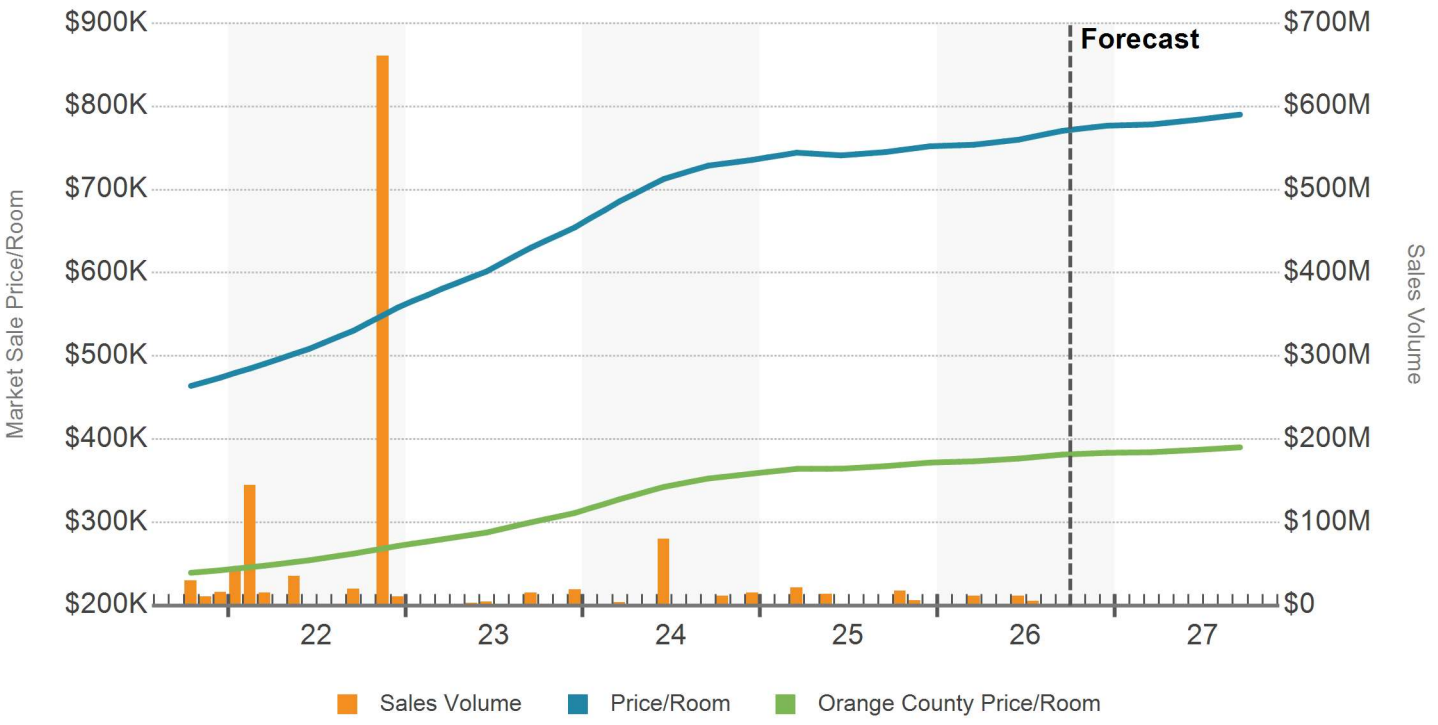

In the past 12 months, 5 hotels traded in Newport Beach/Dana Point, for a transaction volume of $51.3 million. This compares to the three-year annual sales volume average of $74.9 million.

Sales involving Luxury & Upper Upscale accounted for $11.4 million in sales volume over the past 12 months, Upscale & Upper Midscale had $28.7 million worth of transactions, and trades involving Midscale & Economy assets accounted for $11.2 million over the same period.

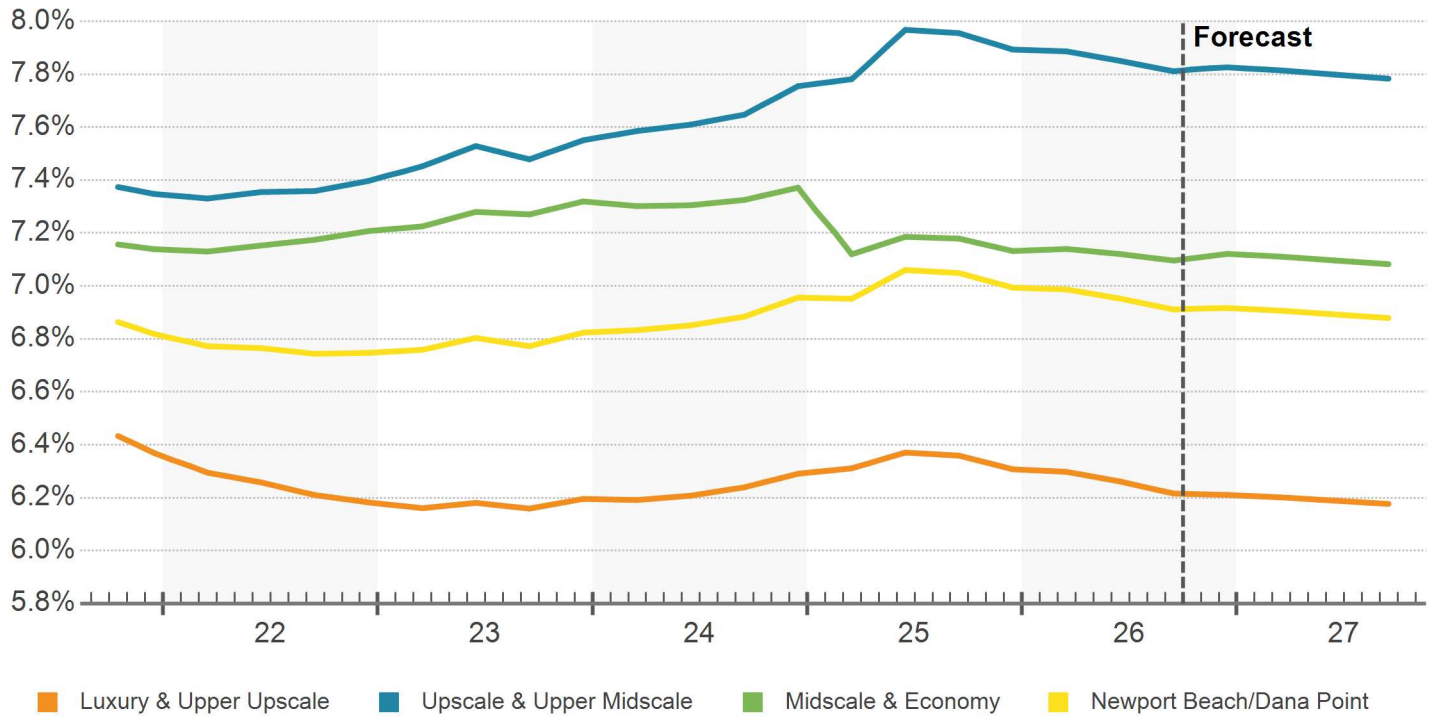

The market cap rate, or the estimated cap rate for the market, stands at 6.9% compared to the Orange County average of 7.3%.
